PURPOSE

This bulletin highlights new model features, carry over features, service and option package information for the 2024 Mirage (U.S. models, other markets may be different). Review the details that follow to familiarize yourself with this information. Refer to the 2024 Mirage Service Manual on MEDIC, MDL, or CD (p/n MSCD-016B-2024), and the Owner's Manual for details on these and other features. For information about the Display Audio or Smartphone Link Display Audio (SDA), system, refer to the audio system owner's manual in the glovebox.

- Offered Exclusively in White Diamond Exterior with Black Roof (Standard)

INTERIOR

Leather Steering Wheel and Shift Knob

2024 Mirage SE and RALLIART SAM models receive a touch of class with leather wrapped steering wheel and shift knob.

CONVENIENCE

7.0" Smartphone Link Display Audio (SDA)

All 2024 Mirage models are equipped with SDA so vehicle owners can stay connected while focused on the road.

FAST-Key and Push Button Start

2024 Mirage SE and RALLIART SAM models have the FAST-Key system which allows you to unlock, start up the engine, and hit the road without fumbling around for your keys. When paired up with push button start, getting on the road is quicker and easier in the SE and RALLIART SAM models.

SAFETY

Forward Collision Mitigation (FCM)

All 2024 Mirage models have Forward Collision Mitigation (FCM). If a car or pedestrian is in front of you and the brakes are not applied and the risk of collision is imminent, Forward Collision Mitigation will automatically attempt to employ the brakes.

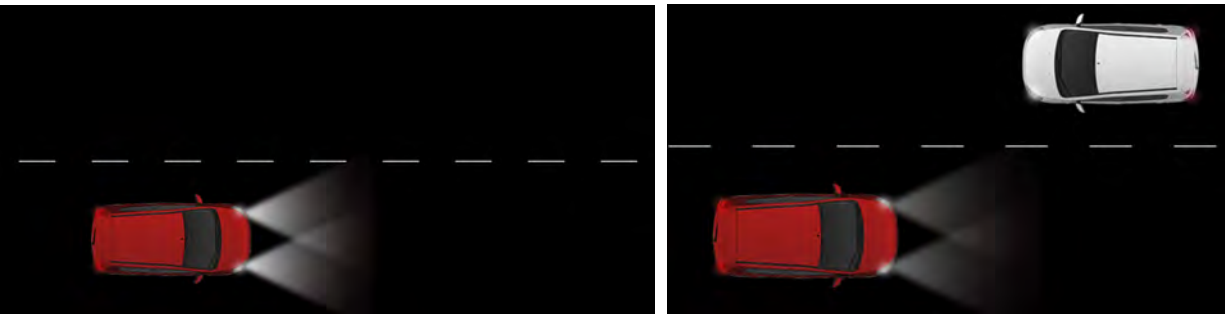

Lane Departure Warning

2024 Mirage SE and RALLIART SAM models have Lane Departure Warning (LDW). The Lane Departure Warning system regularly monitors the lane position and gives a gentle reminder if it detects the vehicle is drifting.

Automatic High Beam

RALLIART SAM models will detect when other vehicles are approaching or ahead of you and will automatically dim the headlights to reduce glare for other drivers.

SAFETY (Continued)

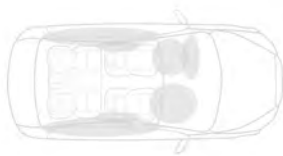

Rear-View Camera System

The 2024 Mirage's rear-view camera system provides eyes on all sides of the vehicle so that drivers can park and confidently back out of tight spots.

7 Airbag Safety System

The 2024 Mirage has six standard airbags, including front, front seat mounted, and side curtain airbags. A seventh airbag is located underneath the driver's side dashboard to provide more protection. Airbags are part of a Supplemental Restraint System (SRS). To decrease the risk of injury from a deploying airbag, always wear a seat belt, sit upright in the middle of the seat and do not lean against the door. Always place children 12 and under in the rear seat and use appropriate child restraints. Never place a rear facing infant restraint in the front seat. See the owner's manual and instruction provided with child restraints for additional information.

LED Headlights and Fog Lights

For increased visibility, even in difficult weather, the 2024 Mirage SE and RALLIART SAM feature LED headlights and foglights.

PERFORMANCE

Hill Start Assist

2024 Mirage models are equipped with Hill Start Assist . When stopped on an incline, activating this feature will help maintain the vehicle's position and prevent it from rolling backward.

Hill Start Assist briefly maintains the engagement of the brake to allow drivers to move their foot from the brake pedal to the accelerator pedal without the vehicle rolling while stopped on a hill. This feature is not a substitute for breaking or the use of the parking brake.

Active Stability Control (ASC)

Active Stability Control helps keep the vehicle driving in a straight line on slippery roads and in challenging weather.

The Adaptive Stability Control system is not a collision avoidance system or an automatic driving system. It is designed to use only limited braking and is never a substitute for safe and careful driving and should not be solely relied upon.
