LED Headlights

LED headlights are strategically position both high and low to provide improved visibility for others sharing the road, while offering better lighting across long distances.

EXTERIOR (Continued)

Available Power Panoramic Sunroof

Spanning an impressive length the available panoramic sunroof with narrow drip rails provides greater overall visibility while filling the cabin with natural light.

SAFETY FEATURES

Advance Driver Assistance System (ADAS)

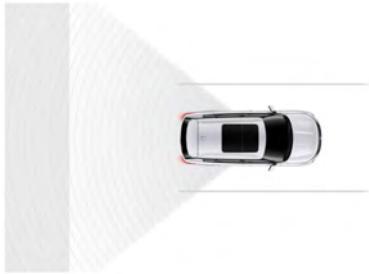

Advanced Driver Assistance System (ADAS) employs a range of sophisticated safety technologies that provide protection and help to reduce the chance of collisions.

SAFETY FEATURES (Continued)

Rear Automatic Emergency Braking (Rear AEB)

Sonar sensors near the rear bumper can detect objects behind the vehicle. If something is too close, Rear Automatic Emergency Braking issues an audible warning and attempts to stop the vehicle, helping to reduce the chance of an accident.

Blind Spot Warning

When a vehicle approaches the driver's blind spot, a warning light will illuminate in the corresponding side mirror. If the turn signal is also on, the warning light blinks and the system beeps three times letting the driver know it is not safe to change lanes.

Forward Collision Mitigation with Pedestrian Detection

If the Outlander detects a car or pedestrian in front of the vehicle through the front radar and camera, a warning appears. If the brakes are still not applied and the risk of collision is judged to be imminent, Forward Collision Mitigation applies the brakes.

SAFETY FEATURES (Continued)

Multi-view Camera System

The 360° camera view of the Outlander lets the driver park with confidence and ease. As the cameras mounted on the front, rear, and sides of the vehicle collaborate, Multi Around View Monitor reduces those pesky blind spots.

Tire Pressure Monitoring System (TPMS) with Tire Fill Notification

Easily accessible on the information display, the Outlander's Tire Pressure Monitoring System not only offers recommendations on how to improve fuel efficiency, but provides details on each tire. When you're refilling the tires, you'll know when you've reached the optimal pressure when the Outlander honks the horn.

Trailer Stability Assist System

The Outlander's Trailer Stability Assist brakes one or more of the vehicle's wheels as necessary to help reduce trailer sway.

PERFORMANCE

Engine

The Outlander's 2.5 liter 4-cylinder engine provides enhanced horsepower and torque, as well as improved fuel economy and clean emissions at the highest possible levels. By incorporating the latest technologies, like the use of direct injection, an electrically operated valve timing control system, cooled exhaust gas recirculation, and mirror bore coating, the Outlander's engine balances fuel economy with accelerated performance.

Electric Power Steering

Steering feels more pleasant and natural with the Outlander's improved dual-pinion electric power steering. With an increased adjustment range and telescopic steering, enhanced comfort is provided to each individual driver.

Suspension

The Outlander's suspension features lightweight and high-rigidity aluminum components, hollow stabilizing bars, and anti-vibration support.

COMFORT

Seating

Eight unique power seating adjustment options, as well as the Outlander's memory seat function key-linked to each driver - the mirrors, digital cluster settings, and leather or semi-aniline leather cushions all adjust to suit the drivers body for a perfect, custom fit.

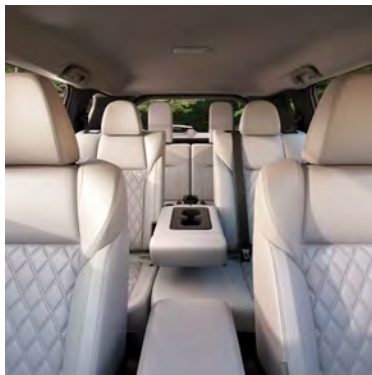

Triple-Zone Climate Control

Available Triple-Zone Climate Control gives the driver, passenger, and rear passengers separate control over their own personal zone.

Third Row Seating

The Outlander offers three rows of seating for up to seven people.

TECHNOLOGY

Speed Limit Assist

The Outlander's Navigation and Traffic Sign Recognition automatically detects speed limits, so MI-PILOT Assist™ can adapt accordingly.

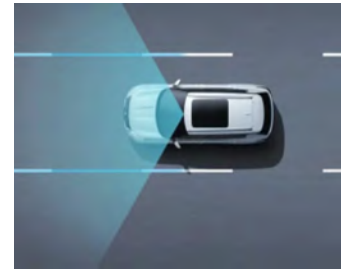

Traffic Jam Assist

Even when in stop-and-go traffic, MI-PILOT Assist™ can be resumed with the push of a button.

Lane-Centering Technology

While MI-PILOT Assist™ is activated, Lane Keep Assist helps keep the Outlander centered in your lane of travel by making minor steering adjustments. The driver's hands, however, must still be placed on the steering wheel.

Head-Up Display

The available 10.8" Head-Up Display (HUD) puts a wealth of information right on the windshield, so you know exactly what's going on around you without taking your eyes off the road.
