91-23-03 - MIB3 Various Infotainment Concerns Release date: 7/24/2023

Condition

Applicable Vehicles					
Model(s)	**Year**	**Eng. Code**	**Trans. Code**	**VIN Range From**	**VIN Range To**
Arteon, Atlas, Atlas Cross Sport, Golf/GTI, Jetta, Tiguan	2021	All	All	All	All
Arteon, Atlas, Atlas Cross Sport, Jetta, Taos, Tiguan	2022 - 2023	All	All	All	All

Revision Table			
Instance Number	**Published Date**	**Version Number**	**Reason For Update**
2070941/1	07/24/2023	91-23-03	Original publication.

⚠️**Note:**

This technical bulletin must be read in its entirety before attempting the software update.

If software updates or flash campaign/actions are performed on a vehicle, a charger with at least 70A charging current MUST be used in order to avoid problems during software updates and flash campaign/actions.

The customer may report one or more of the following symptoms:

Infotainment system freezes and/or reboots

Infotainment system will not turn on/boot up

Infotainment system loses sound and/or volume controls malfunction

Navigation system malfunctions

App-Connect malfunctions

SiriusXM radio malfunctions

91-23-03 - MIB3 Various Infotainment Concerns

Release date: 7/24/2023

Technical Background

This procedure resolves the concern(s) specified above by updating the MIB3 Infotainment System to the latest software level **0841**.

Production Solution

Not applicable.

Service

Software Update Procedure

Connect the MTRMSP0702 battery maintainer/charger to the vehicle's 12 volt battery.

Switch the ignition to the ON position.

Check the current software level by pressing the "Menu" hard key.

Page over in the Infotainment menu to select "Settings" from the touchscreen menu.

In "System Settings", scroll down to select "System Information" from the touchscreen menu.

If the "Software" level is lower than **0841**, proceed with this Technical Bulletin.

If the "Software" level is equal to or greater than **0841**, this work procedure does not apply.

Create the USB Drive with SD/USB Creator:

Refer to Technical Bulletin 2054866 (00-19-04) Set Up SD/USB Creator to Obtain Software Updates.

Use USB part number **3G0.919.360.TH**

Update Programming:

Section 1: USB

Insert the USB driver **3G0.919.360.TH** into port 1 of the USB connection in the center console.

Press and hold the "Menu" hard key located on the MIB display until "Service Mode" is made available.

Select "Software Update/Versions".

Select "Start Update".

Select "Update".

Select the option "USB 1".

Select "Start Update".

Select "Start Update" again on the following screen.

The software update will now begin. Please note that various screens may be displayed during the update process. Additionally, the infotainment display may switch off/on. This is normal behavior.

When the "Update Summary" screen appears, select "Resume".

When the completed update prompt appears, select "OK".

Section 2: Software Version Management (SVM)

Connect the ODIS tester to the vehicle's Data Link Connector (DLC).

Initiate Guided Fault Finding (GFF) and allow the tester to complete interrogation of all modules.

Once GFF is complete, click on the "Special Functions" tab.

Under "5F – Information Electronics 1 – *J794*", select "Adapting Software".

Select option 1 "Software update via measure code".

Enter SVM code **3700**.

Continue through the test plan, confirming steps as needed.

When the test is complete, the test results will read "Data version in the vehicle is current".

Once the update is complete, exit GFF and remove the USB from the USB drive.
