Technical Background

On model year 2024 Atlas vehicles equipped with Overhead View Camera (PR code KA6), after turning off “transport” mode, a vehicle CAN bus sleep for 5 minutes must take place to put the vehicle camera system in a consumer-deliverable state. The CAN bus sleep takes place when the vehicle’s doors are locked and the vehicle sits uninterrupted for 5 minutes. Immediately following the CAN bus sleep, the camera systems will function normally and the vehicle can be delivered to consumers.

Service

Information only. No repair is required.
