Important Update - Cummins Diesel Engine Availability in Oregon for CY 2024

Communication Type: Product News

Date: 8/30/2023

Attention Freightliner and Western Star Dealers, only 2024 New truck orders with Cummins engines destined for Oregon registration are affected by this news (AF2-037 DOMICILED OREGON).

Cummins has communicated the following to DTNA – "Due to lack of adequate regulatory certainty for 2024 in Oregon, availability of Cummins <525 hp Legacy Diesel engines and >= 525 hp Diesel engines is on-hold at this time. There are no restrictions on the sale of Cummins L9N Natural Gas engines (MHD and HHD) or exempted diesel engines including Transit, Fire & Emergency, National Security." Note that DTNA does not currently sell Cummins engines in Transit applications.

If this Cummins directive changes, we will communicate those changes as soon as possible.

Thank you,
Mary C. Aufdemberg
