

## Valve Stem Extension Contacting Outer Wheel

Published August 2023

### Valid For

VNL, VNR, VNX, VHD, VAH manufactured from 1 January 2018 to 1 October 2023

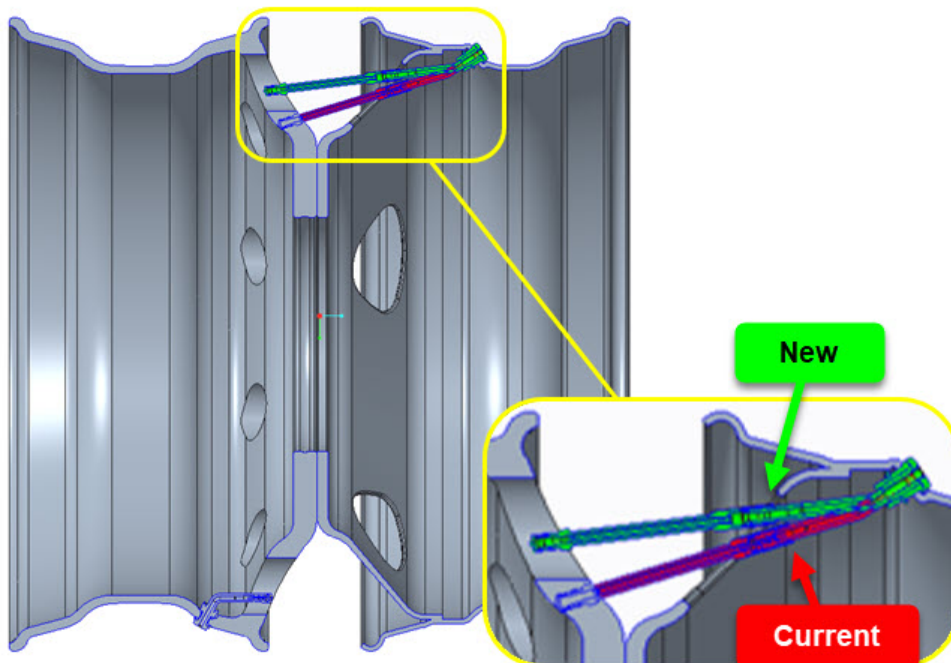

### Solution

For vehicles with certain 22.5" or 24.5" wheels, the inner valve stem extension on the rear wheels may contact the outer wheel.

This solution applies to:

- 22.5" duals with a steel inner and Accuride or Alcoa aluminum outer wheel combination
- 22.5" duals with steel inner and outer wheels
- 24.5" duals with a steel inner and Alcoa aluminum outer wheel combination

For affected vehicles, a new inner valve stem is being introduced that moves the valve stem extension to the center of the corresponding hole in the outer wheel.

See the table below for old and new part numbers:

Old Part #	New Part #s (Either new part can be used to replace old #s)
23805135	23805131, 22504862
22276620	23805131, 22504862
