## PURPOSE

This bulletin contains important new model features, carry over features, service and option package information for the **2024 Outlander Sport** (U.S. models only). Review the details that follow to familiarize yourself with this information. Refer to the 2024 Outlander Sport Service Manual on MEDIC, MDL, or CD (p/n MSCD-017B-2024), and the Owner's Manual for details on these and other features.

AWC is now standard on all 2024 Outlander Sport.

- 4-Way Power Driver Seat
- Black Headliner
- Drive Mode Selector
- Auto Dimming Mirror with HomeLink
- Blind Spot Warning
- Rear Cross Traffic Alert

## ENGINE

The 2.0L MIVEC (Mitsubishi Innovative Valve-timing Electronic Control) engine balances maximum HP of 148 with low fuel consumption for a smooth, efficient drive. The SEL model features even more power with a 2.4L version of the MIVEC.

## TRANSMISSION/DRIVE SYSTEM

All models equipped with All Wheel Control (AWC) have 4WD control logic that protects the drive-train by suppressing heat generation of the electronic-control coupling and provides extraordinary traction and stability in all driving conditions.

## CONVENIENCE

8" Smartphone Link Display Audio system is a standard feature beginning with the LE model.

## INTERIOR

Genuine Leather Seats are standard for the 2024 Outlander Sport SEL Trim:

### Automatic Climate Control

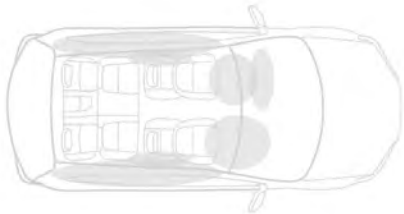

Available automatic climate control lets driver and passenger alike enjoy their personalized settings.

## **SAFETY FEATURES**

### **7-Airbag System**

The Outlander Sport includes six standard airbags: front, front-seat-mounted, and side-curtain airbags. There is also a seventh airbag found underneath the driver's side dashboard.

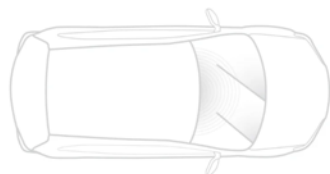

### **Active Stability Control (ASC)**

Active Stability Control employs a series of sensors that constantly monitor the grip of your tires. If one of your wheels begin to slip, this system will work with your Anti-Lock Braking to help you keep control.

### **Rain Sensing Wipers**

Rain Sensing Windshield Wipers activate at the first drop of rain and adjust to match the rainfall.

### **RISE Body Construction**

Reinforced Impact Safety Evolution (RISE) technology helps to route energy away from the driver and passengers in the event of a high-impact collision.

## SAFETY FEATURES (Continued)

### Forward Collision Mitigation (FCM) with Pedestrian Detection

FCM system provides audible and visual alerts when a collision is imminent, and attempts to stop the vehicle to reduce the chance of an accident.

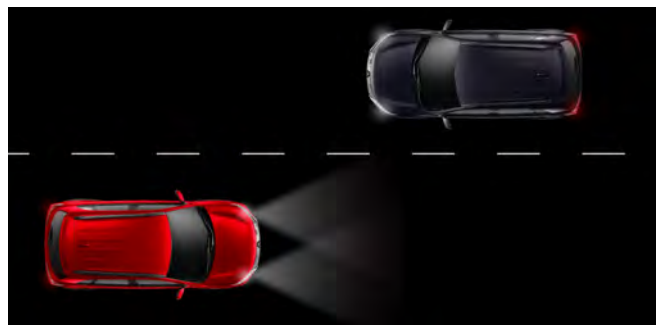

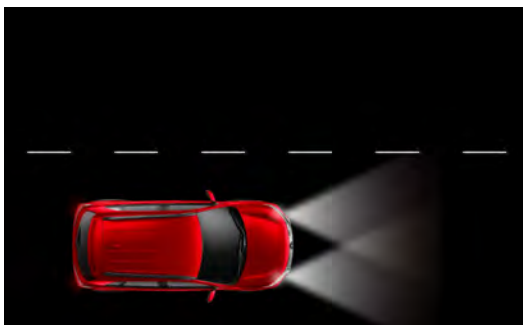

### Lane Departure Warning (LDW)

LDW system regularly monitors your lane position and give audible and visual alerts if it notices that you might be drifting out of your lane.

### Automatic High Beam (AHB)

AHB will automatically switch between high and low headlights to reduce glare for other drivers if other vehicles ahead of you or in oncoming lanes are detected.

# EXTERIOR
