2023-08-15	-	Initial release

Purpose for Parts and Accessories Bulletin

To inform dealerships about the Öhlins® specialty tools that are required for the installation of the Front Fork Kit(s) on 2018-later Softail models.

Vehicles Affected

2018 and Later Softail Models

Markets Affected

All markets affected.

Summary

Depending on the front fork kit(s) which were ordered, the below tools would be required:

- Screamin' Eagle Softail Suspension Tuned by Öhlins Front Kit (Inverted Forks) (Part No. 45400355)
Installation requires the following installation tools:
 - 01765-03 Damping Rod Pullup Tool
 - 01797-07 Seal Head Removal Tool
- Screamin' Eagle Softail Suspension Tuned by Öhlins Front Kit (Conventional Forks) (Part No. 45400356)
Installation requires the following installation tools:
 - 01765-08 Damping Rod Pullup Tool
 - 02810-03 Stopper Plate

The above tools cover the specific Öhlins specialty tools needed for installation. Additional common suspension tools for service (disassembly and reassembly) of Original Equipment (OE) forks may be needed.

Key Messages

- The recently released Screamin' Eagle X Öhlins front fork kits require specific Öhlins specialty tools for installation on 2018-later Softail models.
- These Öhlins specialty tools should be ordered directly through Öhlins (United States 1-800-336-9029 Ext. 1).

- Ohlins has ensured product availability of these tools for Harley-Davidson dealerships.

Questions

Contact Technical Service with any concerns regarding application. Direct all other questions to District Manager or Dealer Services Representative.
