Additional Options (RPO) IVD								
Condition When USB p		When USB programm	amming the radio, you may receive a message that programming is currently unavailable.					
Cause This could be caused		because the 12v battery state of charge is not passing a check.						

Correction:

Follow the instructions below to create a file that will prevent the battery state of charge check from happening.

Download the available USB file transfer from SPS2 for the A11 radio and have it loaded onto the 16GB OR 32GB Type C USB drive formatted to FAT32.
 Open the USB drive on the computer in File Explorer.

3. While in File Explorer, ensure "File name extensions" are check marked (enabled). Renaming the file extension below will not be able to complete with this setting disabled.

a. Windows 10, select "View" then "File name extensions".

5. File Explorer will give you the option rename the "New Text Document.txt" file.

6. Rename the "New Text Document.txt" file to "gm_usb_ignore_battery". Note - Make sure to remove the ".txt" extension.

7. Pop up message to confirm if you want to change the file extension, click "Yes".

Name	Date modified	Туре	Size
New Text Docume it txt	<u>8/3/2023 4:19 PM</u>	<u>TXT File</u>	<u>0 KB</u>
Name	Date modified	Туре	Size

Rename
If you change a file name extension, the file might become unusable. Are you sure you want to change it?
Yes No.

8. After the file is created, the "Type" field should show "File" instead of "TXT File" as it originally did. The size of the "File" should be 0KB.

Name	Date modified	Туре	Size
gm usb ignore battery	8/3/2023 4:19 PM	File	<u>0 KB</u>
		\bigcirc	0

9. Safely "Eject" the USB drive from the computer once completed and connect the USB drive to the vehicle and proceed with USB programming.

Warranty Information

For vehicles repaired under the Bumper-to-Bumper coverage (Canada Base Warranty coverage), use the following labor operation. Reference the Applicable Warranties section of Investigate Vehicle History (IVH) for coverage information.
