GMC	Yukon Models	2017 - 2024	All	All	All	All

Involved Region or Country	North America
Additional Options (RPO)	With Forward Automatic Braking and/or Front Pedestrian Braking
Condition	Some owners may comment when they start their vehicle a "Forward Collision System Reduced" message is displayed on the DIC or there is an amber Automatic Emergency Braking Disable Icon illuminated in the IPC, examples shown below.

	Note: On some models the message displayed maybe "Automatic Collision Prep Reduced".
Cause	This message or amber ICON will display if the Forward Automatic Braking (FAB) or Front Pedestrian Braking (FPB) when equipped, has been set to the "Alert" setting. This setting disables most FAB or FPB functions.

**Correction:**

This is normal when the FAB or FPB has been set to "Alert". There are three selections for the FAB or FPB system: OFF, Alert, Alert and Brake, example shown below. If the FAB and FPB are set to "Alert and Brake" the message or amber ICON will no longer be displayed.
