# Rapid Update 661 Grecale – CVPAM Software Update

DATE: AUGUST 2 2023

Certain Maserati Grecale (M182) MY23 MY24 listed in MODISCS+ are involved in a Rapid Update to update the Central Vision Park Assist Module (CVPAM) software.

This update is necessary to improve the power draw of the CVPAM module from the vehicle's 12V battery.

We remind you that all the Rapid Updates must be performed within the first workshop visit, regardless of the Mandatory setting set in Modis, as required by Maserati policies.

Also, for vehicles in Stock Dealer / PDI, it is necessary to carry out all action operations before delivery to the end customer, as required by the White Book and explicitly reported in the Pre-delivery checklist.

**Please read and review this bulletin first before starting the procedure.**

Contact your Regional AfterSales Manager (RAM) or the Technical Support Helpdesk if you have any questions. ([Maseratitechsupport@maserati.com](mailto:Maseratitechsupport@maserati.com))

Thank You for your continued support and cooperation.

Maserati Americas  
Aftersales Dept.

## Procedure

1. Always check ModisCS+ to see if the vehicle is involved in this action and if it has not been previously performed.
2. Before proceeding, please ensure that the Engine is OFF.
3. Connect a battery maintainer to the 12V battery (For Grecale, it is recommended to use the E-XTEQ MAXIMUS to maintain minimum voltage and current draw requirements)
4. Key ON Engine OFF (KOEO) check battery voltage and make sure it is at least 12.5 or above.
5. Connect the EVO and select **CVPAM ► ECU Programming** and follow the prompts.
6. Procedure complete.

Software version to be installed (or newer).
