# M15X, M161 Rear brake caliper modification

**DATE:** August 3, 2023

The purpose of this Technical Information is to inform the Dealer Network about an aesthetic modification to the rear brake calipers of Ghibli, Quattroporte, and Levante.

**MODELS:** Ghibli (M157), Quattroporte (M156) and Levante (M161) MY23+

**DESCRIPTION:** A production modification of the rear brake calipers has recently been approved on the following combinations of Models and OPTs:

**Levante** (M161) equipped with OPT **5LR** or **5LS**

**Ghibli** (M157) **and Quattroporte** (M156) equipped with OPT **5LR**

**This modification provides that the rear caliper support bracket is no longer painted.**

This solution has already been introduced for Levante, starting from Assembly 6111119 (currently applicable only for the red calipers). It will subsequently be extended to Ghibli and Quattroporte models, encompassing all available caliper colors.

**ACTION:** No repair is needed. The colored rear caliper holder spare parts will be still managed exclusively for vehicles originally produced before this modification.
