

WHAT'S IN THIS UPDATE?

Ford Power-Up 5.2.1

Keep on trailering on.

We've made some changes to your Trailer Profile so that you can now easily add and save your trailer settings, including the trailer name, type, length, height, weight, and brake type, using your keyboard on the vehicle's SYNC screen.

Whether you are headed to the lake or on the job, once the required information is saved, you simply need to select that trailer as the "active" trailer whenever it is connected to your truck. So hit the road because we have you covered.

Ford Power-Up delivers software updates that are designed to help make your Ford Super Duty® truck better over time.
