

2023 MY Corsair

4.2.2

SYNC Step 2

Smart Changes

This Lincoln Enhance software update will change the nomenclature on the center display screen from ActiveGlide to BlueCruise. This update only affects the name of the feature and will not change the way the feature operates. Lincoln will be transitioning the name of Lincoln ActiveGlide® to Lincoln BlueCruise to make it simpler for clients to recognize the feature and its benefits.

Scheduling In-Vehicle is Easier Than Ever

We know how important it is to keep your Lincoln vehicle up to date with the latest software enhancements and features. We also know how busy you are. So, we've streamlined the entire process to make scheduling Lincoln Enhance software updates in-vehicle as easy as can be.

First, we've simplified the recurring update scheduling screen. Here you'll find preselected days and times based on our recommendations that you can quickly choose from. Of course, you can still pick to create a custom schedule to better fit your lifestyle.

To help ensure you're driving the best version of your vehicle, set a Recurring Update Schedule and keep Automatic Updates turned to ON, both of which can be found in settings under Software Updates. If you do, most updates happen seamlessly in the background while you are driving.

Other updates require your vehicle to be parked and can occur without you having to do a single thing. It's convenient and comprehensive all at once.
