Service Managers, and Parts Managers
RE: New Scan Tool Updates
TIN NO. TIN-23-00-009

AFFECTED VEHICLES: 2022-2024 Outlander and Outlander Plug-in Hybrid

PURPOSE:

New scan tool software will be available for download on the evening of Monday, September 18, 2023. Additionally, minor changes for Outlander and Outlander Plug-in Hybrid programming are being implemented and will also be released at the same time.

The minor change requires you to select "Reprogramming" or "Programming" *after* clicking on the "ECU Reprogramming (SDB)" button. Reprogramming is for reflashing an existing ECU and Programming is for use after installing a new ECU.

It is **critical** that both updates are installed:

- **Update #818** MUT3-SE Software Update (SEW23061-02)
- **Update #819** New Reprogramming files for new ECUs

Thank you in advance for your immediate attention.
