

Subject: TRANSMISSION INITIAL LEARNING PROCEDURE / WARNING LIGHT ON OR FLASHING AFTER TRANSMISSION REPLACEMENT	Service Alert No.: SA-057/23
	Last Issued : 10/03/2023

BULLETIN NOTES

APPLICABLE MODEL(S)/VINS:

2024 CX-90 PHEV and H3T

DESCRIPTION

Some vehicles may experience a transmission warning light on or flashing in the instrument cluster with no DTCs after a full transmission replacement. This will affect the configuration or learning with MDARS.

Vehicles having this concern should be repaired using the following repair procedure.

REPAIR PROCEDURE

During Transmission Replacement

1. Follow transmission removal/replacement from the Workshop Manual in MGSS.

- AUTOMATIC TRANSMISSION REMOVAL/INSTALLATION [MM8AX-EC] (H3T)
- AUTOMATIC TRANSMISSION REMOVAL/INSTALLATION [PM8AX-EC] (PHEV)

2. Once installation is completed, Switch the ignition ON (engine on) and switch the ignition OFF two times to verify that the shift system warning light switches from flashing to off (Before initial learning procedure).

3. Perform the configuration. (Refer to [Configuration] in the troubleshooting manual in MGSS).

4. Verify that the shift system warning light turns off.

CAUTION: If step 2 is not completed, the transmission shift warning light will still be present. Turn IG OFF -> IG ON -> IG OFF approximately 120 times at a steady pace to clear the warning light.

6. If the automatic transmission is replaced, perform the automatic transmission initial learning. (Refer to [Automatic Transmission Initial Learning] in the troubleshooting manual in MGSS).
