

OTA v2.1.33 Updates, Performance Improvements & Fixes

UPDATES, PERFORMANCE IMPROVEMENTS & FIXES

We have made changes to the software in your vehicle to improve your overall experience

- We have improved the range estimation capabilities for Pure AWD vehicles.
- We have made changes to the audio system related to SXM to improve the handoff between WiFi and LTE as well as some general UI improvements.
- We have made changes to the Scheduled Charging and how it operates at Low Charge Levels. When the vehicle has a low state of charge it will no longer enforce Schedule charging, allowing owners to charge their vehicle at their discretion.

UPDATES, PERFORMANCE IMPROVEMENTS & FIXES

Levels. When the vehicle has a low state of charge it will no longer enforce Schedule charging, allowing owners to charge their vehicle at their discretion.

- We have updated your navigation system with many improvements and new features, including:
 - Navigation Audio Guidance now sounds more natural, by also mentioning if the upcoming turn will be at a light or stop sign.
 - EV Routing range predictions for all Air vehicles now also considers battery age.
