Campaign parts should always be ordered as per the parts information in this circular. The ordering system will supersede the part, if applicable.

Claim Entry Instructions

The labor times listed here may differ from the labor operations and labor times listed in ELSA.

After campaign has been completed, enter claim as soon as possible to help prevent work from being duplicated elsewhere. Attach the ELSA screen print showing action <u>open on the day of repair</u> to the repair order. If customer refused campaign work:

- ✓ U.S. dealers: Submit request via WISE under the Campaigns/Update/Recall Closure option.
- ✓ <u>Canada dealers:</u> Upload the repair order [signed by customer] to Volkswagen WIN/Operations/Campaign Closure.

Subject: Service Action 34K1 - Transmission Control Module (TCM) Software

Dear Volkswagen Owner,

As part of Volkswagen's ongoing commitment to customer satisfaction, we are informing you of our decision to conduct a service action on certain 2018 model year Volkswagen Golf R vehicles. Our records show that you are the owner of a vehicle affected by this action.

About this Service Action:	Volkswagen is providing updated transmission control module (TCM) software to enhance an in-vehicle alert should a problem arise within the auxiliary hydraulic pump. Additionally, if a specific fault is found after the software is updated, a repair will be made to the transmission.					
What will we do?	Your authorized Volkswagen dealer will update the transmission control module (TCM) software in your vehicle. This work will take about an hour to complete and will be performed for you free of charge.					
	Additionally, if a specific fault is found after the software is updated, a repair will be made to the transmission. If this additional work is necessary, it will take about a day and will be performed for you free of charge.					
	Please keep in mind that your dealer may need additional time for the preparation of this service action, as well as to accommodate their daily workshop schedule.					
What should you do?	Please contact your authorized Volkswagen dealer as soon as possible to schedule this service. To set up an appointment online, please visit <u>www.vw.com/find-a-dealer.</u>					
	This service action will be available for you <u>free of charge only until December 31</u> . <u>2026</u> . If you wish to have this service performed after that date, your dealer's normal costs associated with this repair will apply.					
Lease vehicles and address changes	If you are the lessor and registered owner of the vehicle identified in this action, please forward this letter immediately via first-class mail to the lessee within ten (10) days of receipt. If you have changed your address or sold the vehicle, please fill out the enclosed prepaid Owner Reply card and mail it to us so we can update our records.					
Can we assist you further?	If your authorized Volkswagen dealer fails or is unable to complete this work free of charge within a reasonable time, or if you should have any questions about this communication, please reach out to us using your preferred method of communication at <u>www.vw.com/contact</u> or by calling us at 800-893-5298.					
Checking your vehicle for open Recalls and Service Campaigns	To check your vehicle's eligibility for repair under this or any other recall/service campaign, please visit <u>www.vw.com/owners/recalls</u> and enter your Vehicle Identification Number (VIN) into the Recall/Service Campaign Lookup tool.					

We apologize for any inconvenience this matter may cause; however we are taking this action to help ensure your vehicle continues to meet and exceed your expectations.

Sincerely,

Volkswagen Customer Protection

Subject: Service Action 34K1 - Transmission Control Module (TCM) Software

Dear Volkswagen Owner,

As part of Volkswagen's ongoing commitment to customer satisfaction, we are informing you of our decision to conduct a service action on certain 2018 model year Volkswagen Golf R vehicles. Our records show that you are the owner of a vehicle affected by this action.

About this Service Action:	Volkswagen is providing updated transmission control module (TCM) software to enhance an in-vehicle alert should a problem arise within the auxiliary hydraulic pump. Additionally, if a specific fault is found after the software is updated, a repair will be made to the transmission.
What will we do?	Your authorized Volkswagen dealer will update the transmission control module (TCM) software in your vehicle. This work will take about an hour to complete and will be performed for you free of charge.
	Additionally, if a specific fault is found after the software is updated, a repair will be made to the transmission. If this additional work is necessary, it will take about a day and will be performed for you free of charge.
	Please keep in mind that your dealer may need additional time for the preparation of this service action, as well as to accommodate their daily workshop schedule.
What should you do?	In order to limit any possible inconvenience, please contact your authorized Volkswagen dealer as soon as possible to schedule this service. Please keep in mind that your dealer may need additional time for the preparation of the repair, as well as to accommodate their daily workshop schedule.
	This service action will be available for you <u>free of charge only until December 31</u> . <u>2026</u> . If you wish to have this service performed after that date, your dealer's normal costs associated with this repair will apply.
Lease vehicles and address changes	If you are the lessor and registered owner of the vehicle identified in this action, please forward this letter immediately via first-class mail to the lessee within ten (10) days of receipt. If you have changed your address or sold the vehicle, please fill out the enclosed prepaid Owner Reply card and mail it to us so we can update our records.
Can we assist you further?	If your authorized Volkswagen dealer fails or is unable to complete this work free of charge within a reasonable time, please contact Customer Relations, Monday through Friday from 8AM to 8PM EST by phone at 1-800-822-8987 or via our "Contact Us" page at <u>www.vw.ca</u> .

We apologize for any inconvenience this matter may cause; however we are taking this action to help ensure your vehicle continues to meet and exceed your expectations.

Sincerely,

Volkswagen Customer Protection

Repair Overview

- Update TCM software.
- Perform road test and check for TCM faults afterward.
- Replace auxiliary hydraulic pump inside gearbox only if specific faults set.

- These repair instructions may differ from the labor operations and labor times listed in ELSA.
- Damages resulting from improper repair or failure to follow these work instructions are the dealer's
 responsibility and are not eligible for reimbursement under this action.
- This procedure must be read in its entirety prior to performing the repair.
- Due to variations in vehicle equipment and options, the steps/illustrations in this work procedure may not
 identically match all affected vehicles.
- Diagnosis and repair of pre-existing conditions in the vehicle are not covered under this action.
- When working during extreme temperatures, it is recommended that the vehicle be allowed to acclimate inside the shop to avoid temperature-related component damage/breakage.

Required Tools (software update)

Battery Tester/Charger -VAS5908-

(or equivalent charger with a current rating of at least 70A)

Diagnostic Tester -VAS6150X/VAS6160X-(or equivalent)

Required Tools (auxiliary hydraulic pump replacement – if required) NOTE: Refer to ELSA Repair Manual as needed for additional tools not listed here

Repair Instruction

Section A - Check for Previous Repair

• Enter the VIN in Elsa and proceed to the "Campaign/Action" screen.

On the date of repair, print this screen and keep a copy with the repair order.

- Confirm the Campaign/Action is open <arrow 1>. If the status is closed, no further work is required.
- Note the Applicable Criteria ID <arrow 2> for use in determining the correct work to be done and corresponding parts associated.

CRITICAL REPAIR STEP

If multiple software update Campaign/Actions are open, they must be performed in order of the Start date <arrow 3>. The oldest should be performed first.

- All Safety Recalls must be completed prior to completing this campaign.
- Proceed to Section B.

I NOTE

If the transmission was replaced on a previous service (after 10-01-2018), this work does not have to be performed. Contact Volkswagen Warranty if there was a previous transmission replacement.

Section B – Update TCM Software

Prior to launching the VAS Diagnostic Tester and starting an update, ensure the following conditions are met;

- ✓ The ODIS software is completely up to date.
 - Refer to the "Alerts" section on ServiceNet home page for the current ODIS version.
- ✓ The battery charger is connected to the vehicle battery and remains connected for the duration of the software update.
 - Battery voltage must remain above 12.5 volts for the duration of the software update. Failure to do so may cause the update to fail, which could result in damage to the control module. Control modules damaged by insufficient voltage will not be covered.
- \checkmark The screen saver and power saving settings are off.
 - Failure to do so may result in the tester entering power save mode during the software update, which could result in damage to the control module.
- ✓ The VAS Diagnostic Tester is plugged in using the supplied power adapters.
 - Under no circumstances should the tester be used on battery power alone during the software update. Failure to do so may result in the tester powering off during the update, which could result in damage to the control module.

✓ The VAS Diagnostics Interface MUST ONLY be connected to the tester with a USB cable.

Performing a software update using a Bluetooth or WiFi connection increases the risk of losing connection during the update, which could result in damage to the control module.
 It also greatly increases the time required to perform the update. Requests for additional time or parts will be denied if the GFF log shows the update was performed using Bluetooth or WiFi.

Radiator Fan(s) may cycle ON high speed during the Update Process! There is a serious risk that personal injury may result if contact is made with spinning fan blades. Keep hands and all objects away from Radiator Fan(s) during Update Process!

To Update-Programming using SVM, review and follow instructions in Technical Bulletin 2014603: *Software Version Management (SVM) Operating Instructions.*

The SVM Process must be completed in its entirety so the database receives the update confirmation response. A warranty claim may not be reimbursed if there is no confirmation response to support the claim.

- Damages resulting from improper repair or failure to follow these work instructions are the dealer's responsibility and are not eligible for reimbursement under this action.
- Diagnosis and repair of pre-existing conditions in the vehicle are not covered under this action.

- All campaign software updates must be completed during a single, standalone ODIS Diagnostic Session. You must fully complete this campaign and send all logs before beginning any other campaigns or operations.
- If there are any ODIS "Hot-Fix" patches installed, they must be removed from the scan tool before beginning this operation. ODIS "Hot-Fix" patches may affect the update process.
 - Open the hood.
 - Open the battery cover.
 - Switch the ignition on.
 - Apply the parking brake.
 - Switch off all consumers (headlights, heated seats, climate control, etc.).
 - Connect the VAS6150X/VAS6160X Diagnostic Tester to the vehicle.
 - Start the ODIS program.
 - Attach the battery charger to the vehicle battery.

Vehicles with Battery Monitoring Control Module -J367- and/or an EFB Battery:

When connecting the charger to the battery, connect the positive cable to the positive terminal of the battery and connect the negative cable to the grounding lug on the chassis. DO NOT connect the ground cable directly to negative terminal of the battery.

• Turn the hazards on.

The procedure may cancel itself if the hazard warning lights are not switched on. The hazard warning lights prevent the system from switching to bus sleep mode during the update.

Help Cancel test

K < > >

- Confirm that scan tool is communicating with the diagnostic head by USB <Green Arrow>.
 - If the Bluetooth symbol is shown <Red Arrow> then disconnect the diagnostic head from the vehicle and reconnect the USB cable to the diagnostic head and then reattach to the vehicle.
- Upon ODIS startup, verify the "Diagnosis" operating mode is selected <as shown>.
- Once the GFF scan is complete, select "Special functions" <arrow 1>, then "Adapting software" <arrow 2>, then select "Perform test" <arrow 3>.

• Select the correct option to "Update software via action code" OR "Software update via measured code".

The different options to perform the SVM operation may vary based on model.

Using <u>Bluetooth</u> for this action is <u>PROHIBITED</u>!

Damage caused to electronic components (e.g. ECM, TCM, etc.) during the SVM flash process is not covered.

• Enter the corrective action code (SVM code) as listed below.

- Select "Accept" <arrow> and follow the on screen prompts.
- During the flash, this screen appears when each operation is performed:

• Select Complete/Continue <arrow> after each operation is completed.

- When the SVM update is complete a confirmation message is displayed <as shown>.
- Select "Complete/Continue" <arrow>.

i TIP

If the software in the vehicle is already current, a message may appear indicating this. If this occurs, complete the ODIS test plan and send the diagnostic protocol online.

- It is <u>IMPERATIVE</u> that <u>ALL</u> of the ignition cycle on/off delay requests are fulfilled in their entirety during this flash process <arrow 1>.
- Failing to wait for the ignition on/off timing cycle to complete (progress bar and countdown timer <arrow 2>) before cycling the ignition on/off MAY damage a control module.
- Damage to control modules as a result of failing to wait the specified time displayed by the progress bar and countdown timer <arrow 2> are <u>NOT</u> covered under this action.
- After the software update is completed and before sending the GFF Log Online:
 - Select the "Control Module" tab.
 - Scroll down and right click on the module that was updated (0002).
 - Select "Identify Control Module" <arrow>.

e Control (ACC)) (5Q0907572.J 0654 ACC BOSCH MQB 3QF907572 H10)

All DTC memory entries were erased. There are new or known DTC memory entries. Calculate a new test plan? Yes No	
m	Þ

• Exit GFF and send diagnostic protocol online when prompted.

INOTE

Static communication faults may store in various control modules during the flash. These faults can only be cleared by following one of these steps:

- Drive the vehicle a short distance (around the parking lot, for example).
- After selecting "Yes", turn the ignition off for 30 seconds, turn it back on and repeat the GFF exit program.
- Clear faults using OBD (an additional key cycle may also be required).
- Release the parking brake.
- Disconnect the VAS tester.
- Switch off and disconnect the battery charger.
- Reinstall the battery cover.

After the update:

- Perform a short bus sleep:
 - Turn off ignition > lock vehicle with remote > wait a few minutes until the cluster goes dark
- Perform another ignition cycle.
- Ensure transmission fluid temperature is between 20 °C and 50 °C.
- Perform a short road test (2-5 minutes).
- If NO gearbox warning lamp or gearbox warning message appears in the instrument cluster:
 - No further work is required.
 - Proceed to Section D.
- If the gearbox warning lamp or a gearbox warning message appears in the instrument cluster:
 - The fault memory must be read out.
 - o If fault "P0C2900 Activation for auxiliary hydraulic pump for transmission oil implausible" is set:
 - The auxiliary hydraulic pump must be replaced.
 - Proceed to Section C.

INOTE

If the gearbox warning lamp lights up at a later date (after the vehicle has been returned to the customer), please refer to Technical Bulletin 2070973 (US) or 2050031 (Canada) for claiming instructions.

A video outlining replacement of the auxiliary hydraulic pump is available.

Click on the link below or scan the QR code to access the video.

https://vwcup.track360.com/library/13062

If internal or external damage caused by the auxiliary hydraulic pump bolts coming loose is found before or during the repair:

- Take clear photos
- <u>U.S. dealers:</u> Create a WISE Campaign Authorization request and attach photos for review.
- <u>Canadian dealers:</u> Create a TAC WEB ticket with the photos attached for review.

A missing bolt or damaged bolt is considered internal transmission damage.

Drain gear oil:

 See ELSA Repair Manual: Repair manual > Drivetrain > 7-Speed DSG Transmission 0GC > 34 Controls, Housing > Transmission Fluid > Transmission Fluid, Draining and Filling

Remove transmission:

 See ELSA Repair Manual: Repair manual > Drivetrain > 7-Speed DSG Transmission 0GC
 34 Controls, Housing > Transmission, Removing and Installing > Transmission, Removing, Vehicles with Gasoline Engine

Secure transmission to stand:

 See ELSA Repair Manual: Repair manual > Drivetrain > 7-Speed DSG Transmission 0GC > 34 Controls, Housing > Securing on Engine and Transmission Holder

Remove bevel box:

 See ELSA Repair Manual: Repair manual > Drivetrain > 7-Speed DSG Transmission 0GC > 34 Controls, Housing > Bevel Box > Bevel Box, Removing

Remove transmission oil pan:

- Place used oil collection container under the transmission.
- Remove the clamp <3>.
- Loosen and remove the screws <1> in a diagonal sequence.
- Remove the oil pan <2> and if necessary loosen the oil pan by hitting lightly with a rubber hammer.

Remove mechatronic:

- Loosen and remove the screws <arrows> in a diagonal sequence.
- Carefully remove the mechatronic <1>.

Store the Mechatronic properly:

- Store the Mechatronic so that the sensors <arrows> face upward.
- Place and cover the mechatronic on clean, lint free cloths.

Remove gear oil filter:

•

Remove gear oil filter housing <1> and filter.

Remove dual clutch:

• See ELSA Repair Manual: Repair manual > Drivetrain > 7-Speed Dual Clutch Transmission 0GC > 30 Clutch > Clutch > Dual Clutch, Removing

Remove housing bolts on <u>clutch side</u>:

- DO NOT REMOVE BOLTS <1>.
- Remove bolts <arrows>.
- Note the lengths of the removed bolts. There are two different length bolts.

• Alternate view of the two bolts <1> <u>that are not</u> <u>removed</u> at this time.

Remove housing bolts on gearbox side:

- Rotate transmission on stand.
- Remove bolts <arrows>.

Move transmission:

- Move transmission to a suitable work bench or cart.
- The splined shaft must face upward.
- Support the transmission from tipping using wood blocks as needed.

Remove oil guide tubes:

- Loosen each oil tube by turning slightly using suitable circlip pliers.
- Then pull each oil tube out.
- Screw a suitable self-tapping screw or wood screw into the oil tube <4>, loosen the tube and then pull it out.

INOTE

When removing the oil tubes, parts of the seals can become cut off.

Make sure there no seal pieces left in the gearbox.

Remove remaining two housing bolts:

• Remove bolts <arrows>.

Release sealant bead:

• Carefully release sealant bead between housing sections by applying minimal force using pry bars <A>.

If the housings are not separating, make sure all of the oil guide tubes are removed.

INOTE

Proper positioning of pry bar <A> shown.

Risk of irreparable damage to gearbox housing. Use extreme care when releasing the sealant bead and do not use excessive force.

Pay close attention to surfaces being pried against so that damage does not occur.

Proper positioning of pry bar <A> shown.

Risk of irreparable damage to gearbox housing. Use extreme care when releasing the sealant bead and do not use excessive force.

Pay close attention to surfaces being pried against so that damage does not occur.

Pay particular attention to the transmission oil pan sealing surface. The surface must not be compromised.

Install guide pins:

• Screw guide pins -T40288- <1> into gearbox housing on opposite sides, as shown.

• To aid in re-assembly, mark the position of both guide pins on gearbox housing with a felt-tip pen.

- Lift clutch housing <1> off vertically along guide pins.
- Place clutch housing <1> down safely on a suitable workbench with intake filter <2> facing upwards.

• Remove bolt <1> and remove intake filter <2>.

Remove changeover valve bolts:

- The changeover valve and pipe are not removed.
- Remove bolts <arrows> for changeover valve <1> and oil pipe <2>.
- Note the length of the removed bolts. There are two different length bolts.

Remove auxiliary hydraulic pump:

- Remove bolts <arrows>.
- Carefully detach auxiliary hydraulic pump <1> upwards and pull it out of oil pipe <2>.

Replacing auxiliary hydraulic pump:

- Fit a new oil pipe <1> from the repair kit to the new auxiliary hydraulic pump <2>.
- Coat the o-ring on the oil pipe with clean oil.

• Install new O-ring <1> from the repair kit on the changeover valve oil pipe.

Install auxiliary hydraulic pump:

- Install new auxiliary hydraulic pump with oil pipe from the repair kit in the reverse order of removal.
- When installing, ensure that the shaft matches up with the splines in the housing <arrow 1> and the oil pipe guide is fitted on the rib <arrow 2> on the housing.

INOTE

Detail of auxiliary hydraulic pump shaft splines shown.

Verify oil pipe installation:

- Verify that the oil pipe is installed correctly as shown.
- The recess on the oil pipe must fit correctly over the rib on the housing.

Install new auxiliary hydraulic pump bolts:

• Install new bolts <arrows> from the repair kit and torque to 20 Nm + 90°.

Install new bolts for changeover valve and oil pipe:

• Install new bolts <arrows> from the repair kit and torque to 8 Nm + 90°.

Please note that the bolt for the oil pipe is shorter than the two bolts for the changeover valve.

Install new filter and bolt:

 Install new filter <2> from the repair kit and torque new bolt from the repair kit <1> to 8 Nm + 90°.

Remove oil seal:

• Remove oil seal <1> from clutch housing.

Prepare gearbox housing for assembly:

- Clean the sealing surfaces on both housings thoroughly.
- Allow cleaner to dry completely.
- Ensure there is no dirt or sealant residue left inside the gearbox.
- Ensure all oil passages are free of dirt and residue.
- Carefully press pistons for selector rods <arrows> into end position using a suitable tool (socket, for example) if necessary.

• Move shift forks <2> and <3> into neutral position.

The shift forks are in the neutral position when the radius cut out on the shift forks are clearly visible in the center of the windows of the gearbox housing.

- Align injection pipe <1> correctly in housing; guides <arrows> must align precisely with clutch housing when fitted.
- Move selector forks <2> and <3> into neutral position.

- The two guides of the injection pipe must be inserted precisely into the corresponding holes <arrows> in the clutch housing during assembly.
- In the event of an incorrect alignment, it will not be possible to install the clutch housing.

• When fitting the housing sections together, you can reach through the opening <arrow> with your finger to adjust the position of the injector pipe <1> slightly.

• Install new O-ring <1> from the repair kit.

INOTE

To aid in assembly, the O-ring can be held in place using no more than 1 gram of Vaseline.

• Check that dowel sleeves <arrows> are not damaged and are seated correctly.

Apply sealant:

- Apply a bead of sealant <1> to the gearbox housing as shown.
- Ensure sealant is applied completely around any openings as shown in the illustration.
- Pay close attention to the dowel sleeves and "turret" <arrows>. Ensure sealant is applied completely around those openings.

INOTE

The O-ring is installed at area <A>. Note that sealant is only applied on the inside edge of the housing in the area of the O-ring. Do not allow sealant to enter the oil opening.

Reassemble gearbox housing:

- Reference the previously made marks and reinstall guide pins -T40288- into the gearbox housing (if the guide pins were previously removed).
- With the assistance of a second technician, carefully install clutch housing <1> on roller bearings in gearbox housing.
- When installing, pay attention to injection pipe <2> and selector forks <3> and <4>.
- With minimal corrections and shaking lightly, fit housing sections together until air gap between housings is 0 mm.
- If an air gap of 0 mm is not attained, lift clutch housing <1> again and check positions of injection pipe <2> and selector forks <3> and <4>, and correct if necessary.
- Again with minimal corrections and shaking lightly, fit housing sections together until air gap is 0 mm.
- Unscrew guide pins -T40288-.
- Screw in new bolts <1 to 22> from repair kit for housing hand tight on clutch end.

INOTE

Note the different bolt lengths:

- Pink bolts = M8x38
- Green bolts = M8x75
- After all bolts are hand tight, torque the bolts as follows in sequence <1 to 22>:
 - 1st stage = 20 Nm.
 - \circ 2nd stage = 90°
- The gearbox can now be moved to the engine stand for final assembly.

 Install new bolts <arrows> from the repair kit and torque to 20 Nm + 90°.

Install new oil guide tubes:

- Lubricate new oil guide tubes lightly with gearbox oil before installing.
- Install new oil guide tubes <1 to 5> from the repair kit.

Reinstall Mechatronic:

- Installation is the reverse order of removal.
- Use new bolts from the repair kit.
- Tighten bolts as follows in sequence <1 to 9>:
 - \circ 1st stage = by hand
 - 2nd stage = 8 Nm
 - \circ 3rd stage = 45°

Install new cover:

- Clean the sealing surface on the gearbox housing of oil and grease.
- Coat the O-ring with new gear oil.
- Install new cover from repair kit in the reverse order of removal.
- Tighten new bolts from repair kit diagonally in multiple steps and torque to 8 Nm + 60°.
- Install new clamp <3>.

Part Number	Part Description
0BH-325-147	Retaining clamp

Install new gear oil filter from repair kit:

- Coat O-ring with new gear oil.
- Install new gear oil filter and housing and torque to 50 Nm.

Install dual clutch:

- See ELSA Repair Manual: Repair manual > Drivetrain > 7-Speed DSG Transmission 0GC > 30 Clutch > Clutch > Dual Clutch, Installing
- Use new circlip from repair kit.

INOTE

The dual clutch does not need to be re-adjusted; the retaining ring can be re-used, contrary to the information in the Repair Manual.

Ali

Install new oil seals:

 Reference ELSA Repair Manual: Repair manual > Drivetrain > 7-Speed DSG Transmission 0GC > 39 Final Drive, Differential > Seals

INOTE

The repair kit can be used for vehicles with frontwheel drive or all-wheel drive and includes three seals; please make sure that there is always one oil seal left over.

AWD vehicles:

- Left seal p/n = 0BH-409-400-E
- Right seal p/n = 02Q-409-189-A

Reinstall bevel box:

- See ELSA Repair Manual: Repair manual > Drivetrain > 7-Speed Dual Clutch Transmission 0GC > 34 Controls, Housing > Bevel Box > Bevel Box, Installing
- Use new bolts.

Replace crankshaft needle bearing:

- Reference ETKA for the correct needle bearing part number.
- See ELSA Repair Manual: Repair manual > Engine > 4-Cylinder Direct Injection (2.0L, 4V, Turbocharger, Chain Drive, Generation III) - R Models > 13 Crankshaft, Cylinder Block > Crankshaft > Crankshaft Needle Bearing, Replacing

Reinstall transmission:

 See ELSA Repair Manual: Repair manual > Drivetrain > 7-Speed DSG Transmission 0GC
 34 Controls, Housing > Transmission, Removing and Installing > Transmission, Installing

Clear TCM DTC memory and perform basic settings:

- Connect diagnostic tester to the vehicle.
- Perform a full vehicle scan using Diagnosis.
- Switch to Self-diagnosis.
- Select "Basic Setting" for 0002 Transmission electronics.

- All measured values will need to be moved to the selection box, and measured value "[VO]_Auxilliary_transmission_fluid_pump_cover_plate_diags_number" will need to be listed first.
 - Type "fluid" in the filter box and move measured value,
 ""[VO]_Auxilliary_transmission_fluid_pump_cover_plate_diags_number" to the selection box.
 - Then delete "fluid" from the filter box and move all of the remaining measured values to the selection box.
 - Once all measured values are in the selection box, click on the blue forward arrow <1>.

Je certifie que cette campagne de rappel a été exécutée suivant les strictes directives de réparation d'Audi		
Code de SAGA:		
Technicien:		
Date:		
tem # AUD4927FRE		

Section E - Parts Return/Disposal

• Once the campaign has been completed, the technician should stamp the repair order.

- Stamps are available for ordering through the Compliance Label Ordering Portal.
- Proceed to Section E

Properly store (retain), destroy or dispose of removed parts in accordance with all state/province and local requirements, unless otherwise indicated and/or requested through the Warranty Parts Portal (WPP) for U.S. and the Part Destruction and Core Disposition Report for Canada.
