Rapid Update 670 Grecale – IPC Software Update

DATE: OCTOBER 10 2023

Certain Maserati Grecale (M182) MY23 listed in MODISCS+ are involved in a Rapid Update concerning the Instrument Panel Cluster (IPC) software update.

This update is needed to solve the following potential bugs: park assist warning on cluster, speed switch from kph to mph by itself and noise with turn indicators on.

The Rapid Updates #564 and #617 will be closed with the publication of this action.

We remind you that all the Rapid Updates must be performed within the first workshop visit, regardless of the Mandatory setting set in Modis, as required by Maserati policies.

Also, for vehicles in Stock Dealer / PDI, it is necessary to carry out all action operations before delivery to the end customer, as required by the White Book and explicitly reported in the Pre-delivery checklist.

Please read and review this bulletin first before ordering parts and/or starting the procedure.

Contact your Regional AfterSales Manager (RAM) or the Technical Support Helpdesk if you have any questions. (Maseratitechsupport@maserati.com)

Thank You for your continued support and cooperation.

Technical Procedure

1. Always check ModisCS+ to see if the vehicle is involved in this action and if it has not been previously performed.
2. Before proceeding, please ensure that the Engine is OFF.
3. Connect a battery maintainer to the 12V battery (It is recommended to always use the E-XTEQ MAXIMUS to maintain minimum voltage and current draw requirements)
4. Connect the EVO to the vehicle, ensure that battery voltage is around 12.5V then select **IPC** ► **ECU Programming** and follow the prompts.
5. Procedure complete.

Software version to be installed (or newer).

Module	F188 Target
IPC	670305850

Make sure IPC SW update was successfully performed by checking the SW version via "base diagnosis".
