

# Technical Information Service 136/23 ENU WPL8

# WPL8 - Replacing Electric Passenger Compartment Heater (Workshop Campaign)

Revision: This bulletin replaces bulletin Group 8 136/23 WPL8, dated October 5, 2023.

Model Year: As of 2020 up to 2023

Model Line: Taycan (Y1A / Y1B / Y1C)

Concerns: Electric passenger compartment heater

Cause: Due to a potential material error, the heater coating in the electric passenger compartment

heater can become detached on the affected vehicles during prolonged utilization of the heating and with high heating output, especially in countries with frequently cold environ-

mental conditions.

This may result in the heating function being impaired and the vehicle not defrosting properly when

driving.

Action: Replace electric passenger compartment heater.

Affected Only vehicles assigned to the campaign (see also PCSS Vehicle Information).

Vehicles:

# Information

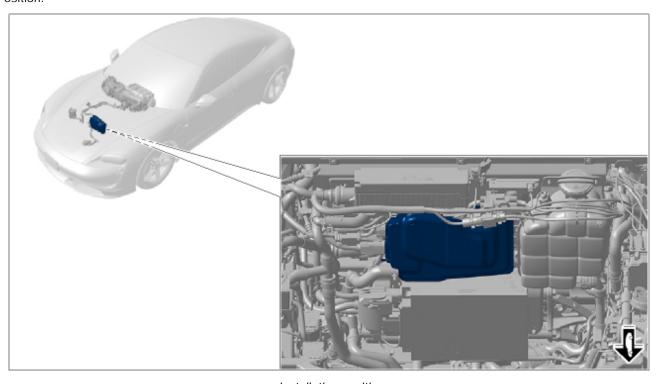

Please note that even on vehicles not assigned to this campaign, the high-voltage heater may fail for various reasons. These vehicles must be processed via the standard repair process (car down case) and will not be reactively assigned to this campaign.

# Service

WPL8 ENU **136/**23

# **Technical Information**

Installation Position:

Installation position

- (Replacing) Electric passenger compartment heater

# Required parts and materials

#### Information

According to the latest knowledge, it is no **longer necessary** to replace the hexagon nut (**N 10737001**) and the hexagon socket screw (**N 91096801**) when replacing the electric passenger compartment heater. **These can therefore be reused**. For this reason, the two part numbers mentioned are removed from this campaign.

For the transitional period, it will continue to be possible to invoice these after installation. The remaining stocks of the internal hexagon round-head bolt (N 91096801) and the hexagon nut (N 10737001) on the market can be used up if necessary. It is not necessary to return the parts.

Parts Info:	Part No.	Designation	Number
	V04015007AK	⇒ Electric passenger compartment heater	1 piece

136/23 ENU

#### Information

From 11/1/23 forward, the campaign part # will not be available to order. As communicated via PPN, the spare part # for the HV Heater will be used for both WPL8 and Car Down (non-campaign) repairs. Either part can be invoiced in WWS for the campaign.

The spare part is:

Part No.	Designation	Number
PAD963507A	⇒ Electric passenger compartment heater	1 piece

Materials: **Only if required** (usually already available in the Porsche Center):

Part No.	Designation	Quantity
00004330516	<ul><li>⇒ Coolant additive, 20-liter/ 5.28 gal container</li><li>– Cooling system</li></ul>	As much as required (max. 0.5 liter/ 16.9
		required per vehicle)

# Required tools

- VAS 6883A Insulated tool set
- VAS 6890 Spring band clamp pliers
- Torque wrench, 2-10 Nm (1.5-7.5 ftlb.), e.g. V.A.G 1783 Torque wrench, 2-10 Nm (1.5-7.5 ftlb.)
- VAS 531 011 Cooling system service equipment
- 3093 3093 Hose clamp
- VAS 6675A Funnel
- Battery charger with a current rating of at least 90 A and if required also with a current and voltage controlled charge map for lithium starter batteries, e.g. VAS 5908 90 A battery charger
- P90999 PIWIS Tester 4

# Replacing electric passenger compartment heater

Incorrect handling of high-voltage components

- Electric shock
- Short circuit
- Fire
- Explosion

- ⇒ Only appropriately trained and authorized persons are permitted to work on high-voltage vehicles and components.
- ⇒ Required qualification: High voltage technician or high voltage expert.
- ⇒ Observe national requirements and legislation for this work.
- ⇒ Always use insulated tools, e.g. VAS 6883 Insulated Tool Set when working on these components.
- ⇒ Observe general warning notes for working on the high-voltage system. ⇒ Workshop Manual '2X00IN General warning notes for working on the high-voltage system'

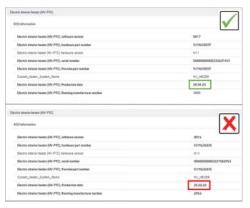

#### Information

If necessary, a data reconciliation from the vehicle analysis log (VAL) can be used to check whether the correct electric passenger compartment heater has already been installed.

To do this, perform a reconciliation of the date of manufacture of the passenger compartment heater installed in the vehicle in the PCSS and function "Comparison of diagnostic data (FAP)" with the currently uploaded vehicle analysis log (FAP).

- If the date of manufacture is later than February 14, 2023 (manufacture > 14.02.2023), an optimized component has already been installed on this vehicle ⇒ Reconciliation of manufacturing date for high-voltage heater (FAP). In this case, it is not necessary to replace the electric passenger compartment heater again.
- If the date of manufacture is before February 14, 2023 (date of manufacture < 14.02.2023), the electric passenger compartment heater must be replaced.

Reconciliation of manufacturing date for high-voltage heater (FAP)

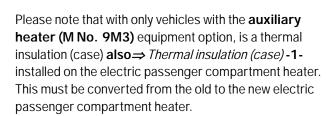

Work Procedure: 1 **CreateVehicle Analysis Log (VAL)** using the PIWIS Tester. Mark the vehicle analysis log you have just created with the attribute "**Pre-VAL**" and after carrying out the campaign, return it using the PIWIS Tester.

136/23 ENU WPL8

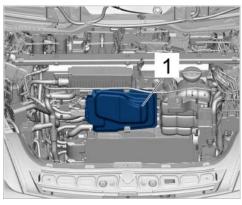

2 Remove electric passenger compartment heater ⇒ Electric passenger compartment heater -1-. For this, see ⇒ Workshop Manual '828019 Removing and installing electric passenger compartment heater'

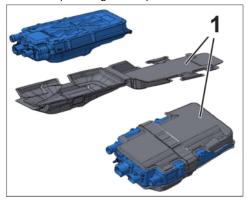

#### Information

3 Install a **new**electric passenger compartment heater. For this, see ⇒ Workshop Manual '828019 Removing and installing electric passenger compartment heater'

Electric passenger compartment heater

Thermal insulation (case)

#### Information

For the new electric passenger compartment heater to be **back-documented correctly**, **the PIWIS Tester must be logged in online** and in the Porsche Partner Network (PPN).

- 4 Teach electric passenger compartment heater. ⇒ Workshop Manual '828055 Replacing electric passenger compartment heater'
- CreateVehicle Analysis Log (VAL) using the PIWIS Tester. Mark the vehicle analysis log you have just created with the attribute "Post-VAL" and after carrying out the campaign, return it using the PIWIS Tester.
- 6 Enter the campaign in the Warranty and Maintenance logbook.

## Warranty processing

#### Information

The labor time specified below was determined specifically for carrying out this campaign and may differ from the labor times published in the Labor Operation List in PCSS.

# **Technical Information**

Labor time: 572 TU

Scope 1:

#### Labor time:

Replacing electric passenger compartment heater

Includes: Deactivating and activating high-voltage system

Draining and filling coolant Bleeding cooling system

Removing and installing luggage compartment tray

Remove and install front cover

Loosening and fastening front end fuse box Loosening and fastening ground strap for battery

Create pre- and post-VAL

Required parts:

VO4015007AK Electric passenger compartment heater 1 piece

Required materials (only if needed):

00004330516 Coolant additive (20-liter/ 5.28 gal container) 0.03 piece

⇒ Damage Number WPL8 066 000 2

## Customer mobility / Vehicle transport

#### Customer mobility for the duration of the carrying out the action

If necessary, customer mobility can be granted and invoiced. As a rule, the current rules governing the Customer Mobility Programme apply here.

#### Vehicle collection from customer (collection and delivery service)

If the customer cannot keep a workshop appointment at short notice to carry out the action, offer to collect the vehicle from the customer and return it after the repair has been completed (collection and delivery service). This service can be invoiced via the mobility voucher in accordance with the applicable preconditions.

If the costs actually incurred exceed the value of the mobility voucher, the remaining amount can be borne from the local customer goodwill budget.

#### Vehicle collection from customer (vehicle transport)

If necessary, the customer can also arrange for the vehicle to be collected and transported to the workshop via the respective Porsche Center. Vehicle transport must be commissioned and invoiced by the Porsche Center responsible.

The costs incurred in the campaign claim can be invoiced as external services (sublets) in the campaign application for WPL8 workshop campaign. Please attach a copy of the invoice to the campaign claim in "External services".

Important Notice: Technical Bulletins issued by Porsche Cars North America, Inc. are intended only for use by professional automotive technicians who have attended Porsche service training courses. They are written to inform those technicians of conditions that may occur on some Porsche vehicles, or to provide information that could assist in the proper servicing of a vehicle. Porsche special tools may be necessary in order to perform certain operations identified in these bulletins. Use of tools and procedures other than those Porsche recommends in these bulletins may be detrimental to the safe operation of your vehicle, and may endanger the people working on it. Properly trained Porsche technicians have the equipment, tools, safety instructions, and know-how to do the job properly and safely. Part numbers listed in these bulletins are for reference only. The work procedures updated electronically in the Porsche PIWIS diagnostic and testing device take precedence and, in the event of a discrepancy, the work procedures in the PIWIS Tester are the ones that must be followed.
