

## **SSM 52115 2023 F-Super Duty, 2023-2024 Expedition, 2024 Nautilus - Remote Start - No LED Confirmation From The Key Fob After A Remote Start Request**

2023 F-Super Duty, 2023-2024 Expedition and 2024 Nautilus vehicles will exhibit no light emitting diode (LED) confirmation from the key fob indicating that the vehicle has remote started (or not remote started). Factory key fobs with remote start no longer contain a LED feedback indicator. Do not replace the key fob for this condition. This is a normal operating characteristic and no service action is necessary.
