

Subject		Market	
<b>Techstream Vehicle ID Options for Sienna HV</b>		<b>USA</b>	
Service Category	Section		
<b>General</b>	<b>Identification</b>		
Applicability			
<b>2021-2023 Sienna HV</b>			

**APPLICABLE VEHICLES**

2021-2023

Sienna HV

**CONDITION**

Vehicle option selection during identification process when connecting Techstream for diagnosis/repair.

**RECOMMENDATIONS**

When connecting Techstream to 2021-2023 Sienna HV vehicles, DO NOT select “w/ADK Package” unless the vehicle is equipped with an autonomous drive kit (ADK). Vehicles equipped with an ADK will have various exterior mounted sensors on the roof, front and/or rear fenders, as well as the rear liftgate/bumper. If “w/ADK Package” is selected, certain ECUs will be excluded from the ECU selection screen and could impact diagnosis. Vehicles equipped with the ADK will be very low volume and will operate in limited regions so it will be rare that the option will need to be selected.
