

TITLE: EV Models - Additional Assembly & Preparation Procedures

SERVICE INFORMATION

Subject

Ninja® e-1 and Z e-1 models require additional, EV related procedures during Assembly & Preparation. A Supplement containing these additional procedures is included with the A&P manual for each model.

- Each motorcycle is supplied (separately) with a battery charger and plug-in charge cable kit.
 - The cable kit must be installed to the motorcycle before delivery to the customer.
 - Installation and user instructions are supplied with the kit.
 - Make sure the user instructions are passed along to the customer.
 - The battery charger and its user instructions must be given to the customer at the time of vehicle delivery.
- Performing the Service Activation automatically starts the warranty period. Do not perform Service Activation until the day the motorcycle will be handed over to the customer.
- The motor drive battery pack serial numbers are also registered in KVCS during Service Activation operation. Make sure the batteries are installed in the motorcycle prior to performing Service Activation. Refer to service bulletin MC23-13 for serial number location information and MC23-11 for Service Activation information.

Warranty Information

This bulletin is service information only, not warranty authorization.
