## News Channel Update | Vehicle Compliance and Analysis

Service Campaign Lau	unch Notification	December 12, 2023									
Campaign No.:	Campaign Desc. :	Perform Injector Coding									
2023060006	23P5492018										
		n launch to update the SCN coding for SCR and VGS on <u>570</u> Model Year ("MY") 2012 cles will be visible and flagged in VMI as "OPEN" on December 12, 2023.									
Background											
Issue	that on ce might no I Emission I communic	Benz AG ("MBAG"), the manufacturer of Mercedes-Benz vehicles, has determined rtain Model Year ("MY") 2012 S-Class (221 platforms) vehicles, the injector codes onger be stored in the engine control unit software after installation of the Approved Modification (AEM). The cached injector code may have been lost due to a lation error during installation of the AEM. Customers may experience the MIL or in rare cases, increased engine noise or rough running.									
What We're Doing		II conduct an Emission Service Campaign in which an authorized Mercedes-Benz recode the correct injector codes to the engine control unit on the affected vehicles									
Parts	Parts are	not required for this campaign since the remedy is software based									
	•	Vehicles Affected									
Vehicle Model Year(s)	2012										
Vehicle Model	S-Class										
		Vehicle Population									

While we regret any inconvenience this may cause, MBUSA is determined to maintain a high level of vehicle quality and customer satisfaction. Approximately two weeks after the posting of this NCU, a letter will be sent to owners notifying them of this emission service campaign. Please refer all customer inquiries to the Customer Assistance Center at 1-800-FOR-MERCEDES.

Service Campaign Bulletin

### **Service Campaign Bulletin**

Campaign No. 2023060006, December 2023

TO: ALL MERCEDES-BENZ CENTERS

SUBJECT: Model S-Class (221 platforms)

Model Year 2012

**Perform Injector Coding** 

Mercedes-Benz AG ("MBAG"), the manufacturer of Mercedes-Benz vehicles, has determined that on certain Model Year ("MY") 2012 S-Class (221 platforms) vehicles, the injector codes might no longer be stored in the engine control unit software after installation of the Approved Emission Modification (AEM). The cached injector code may have been lost due to a communication error during installation of the AEM. Subsequently, during the renewed run of the AEM, no injector code could be read and therefore no code was stored in the engine control unit.

#### Prior to performing this Campaign:

- VMI must be checked before performing campaigns to verify that the campaign is required on a specific vehicle. Always check for any other open campaigns, and perform accordingly.
- Please review the entire Campaign bulletin and follow the repair procedure exactly as described.

Approximately 570 vehicles are affected.

Order No. P-SC-2023060006

#### **Perform Injector Coding**

- Always use the **latest** XENTRY Diagnosis software release with all available add-ons.
  - Follow the operation steps exactly as described in XENTRY Diagnosis.
  - Use a charger to ensure sufficient power supply to the vehicle's **on-board electrical battery system** (greater than 12.5 V).
  - If XENTRY Diagnosis is already connected to the vehicle, start with Work Procedure step 2.

i If two or more software updates or SCN codings are performed during a single workshop visit, operation items **02-4762** and **02-5058** may be invoiced only on one of the workshop orders.

### **Check/test procedure**

- 1. Connect XENTRY/DAS Diagnosis.
- 2. Check the injection quantity adjustment values of fuel injectors.

To do this, select menu item "Control units – Drive – CDI 60LS–Common Rail Diesel Injection - Actual values – Fuel system – "Adjustment of Injector injection quantity".

The injection quantity adjustment values of fuel injectors in XENTRY may **not** start with "**AAAA...."**.

- a. Entries start with "AAAA....": Carry out work procedure.
- b. Entries do not start with "AAAA....": End measure.

### **Work Procedure**

Remove air filter housing on left and right.
 For basic data, see AR09.10-P-1150SXI.

2. Read off injection quantity adjustment values (codings) at all six fuel injectors (Figure 1) and enter adjustment values in the respective field (Figure 2).

Figure 1

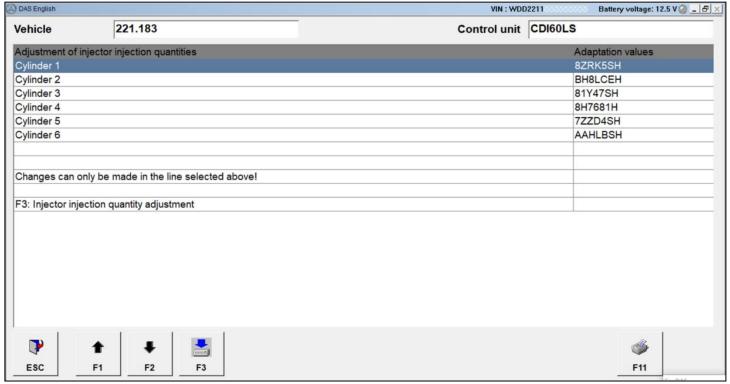

Figure 2

- Disconnect XENTRY Diagnosis.
- 4. Assemble in reverse order.

Note: The following allowable labor operation should be used when submitting a warranty claim for this repair.

### **Warranty Information**

Damage Code	Operation Number	Description	Labor Time (hrs.)
	02-4762*	Connect/disconnect diagnostic system (XENTRY Diagnosis)	0.1
E4 020 49	02-5058*	Connect/disconnect starter battery charger (with XENTRY Diagnosis connected)	0.1
54 920 18	12-1717	Check fuel injectors (with XENTRY Diagnosis connected) Includes: Check injection quantity adjustment values of fuel injectors	0.1
	12-1718	Remove/install air filter housing (after check) Includes: Correct the injection quantity adjustment values of fuel injectors	0.6

<sup>\*</sup> Invoice operation item only once for each workshop order.

Note: Always check Xentry Operation Time (XOT) for the current OP-Code times. Labor times are subject to change and updates may not be reflected in this document.
