

STAR ONLINE PUBLICATION

Case Number: S2317000001

Release Date: September 2023

Symptom/Vehicle Issue: Buzz Squeak Rattle (BSR) From Rear Of Vehicle On Rough Road Or Over Bumps.

Customer Complaint/Technician Observation: Customer describes a noise from the rear suspension or rear of vehicle while driving. Noise could also be on turns or conditions where body roll may be induced such as a turn into a parking lot driveway.

Discussion: Inspect the torque of the rear stabilizer links. Refer to Service Library Service Information 17 - Rear Suspension / STABILIZER BAR, Rear Suspension / Removal and Installation.

This document does not authorize warranty repairs. This communication documents a record of past experiences. STAR Online does not provide any conclusions about what is wrong with the vehicle. Rather, it captures all previous cases known that appear to be similar or related to the vehicle symptom / condition. You are the expert, and you are responsible for deciding on the appropriate course of action.

Contact STAR Center, or your Technical Assistance Center Via TechConnect, eCONTACT or Service Library entry if no solution is found.
