

GENERAL MOTORS  
DCS6774  
URGENT - DISTRIBUTE IMMEDIATELY

Date: January 24, 2024

Subject: Software Update on GM Ultium Vehicles (2024 Blazer EV - Customer Vehicles ONLY)

Models: 2024 Chevrolet Blazer EV (Customer Vehicles Only)

To: All General Motors Chevrolet Dealers

Electric Vehicles (EVs) contain a significant number of electronic modules that may require software updates. These software updates are important to not only correct issues but also enhance vehicle functions.

If a customer owned Blazer EV is brought in for service, GM recommends checking for available software updates and perform any updates that are needed. For further information reference **Bulletin PIE0775** which provides more details on this process.

Thank you for your efforts to provide world-class service to our GM customers.
