REF #: ICI24-006

Effective: 02/20/24

Release: 02/20/24

SUBJECT: FL974 – Revised Bulletin & Population

This letter is to inform you that the FL974 bulletin & population have been revised. Some vehicles in Group F have been moved to Group G, which calls for a different part number, 04-31353-006.

An additional SRT, 996-R211E, has been made available for all groups for situations where the only action needed is to confirm or update the calibration, and a new DEF header is not installed.

Please use the revised bulletin, available on the DTNA Portal, for all repairs going forward.

If you have questions or need further information, contact the Warranty Campaigns Department by submitting an inquiry using the Warranty Support Center (WSC) app, located on the DTNA Portal.

The information contained in this letter supercedes and supplements any related policies and procedures in any previously released bulletins, the Warranty Manual, and/or previously released letters. Failure to read or distribute this letter will not exempt addressees from compliance with the information contained herein.
