

Automated Manual Transmission (AMT) Flywheel Pilot Bearing Wear On Input Shaft

Published 16 February 2024

Valid For

All Mack and Volvo Models 2007 to current

Recommended Actions:

The new flywheel pilot bearing is to be used for AMT transmissions only and it is recommended that this bearing be used when replacing the clutch

Current Part# 20512915

New Part# 1652986

NOTE:

Manual transmissions will continue to use the current part both in production and in the aftermarket.

See Pictures Below Showing Input Shaft Wear

For more information regarding input shaft wear refer to the **Reuse Or Replacement Guidelines** located in [Impact](#) under Function Group 431, Operation Id 4311-06-02-01.
