## Ocean OS 2.0 (1 of 3) Software Update

We are pleased to announce the arrival of Ocean OS 2.0, bringing new features, bug fixes, and enhancements that improve the functionality, convenience, and overall performance of your Fisker Ocean.

Ocean OS 2.0 marks the latest OTA software update available for the Fisker Ocean and will begin rolling out in waves to customers on February 27. This rollout will continue for all customers throughout February and March.

If you haven't already, you should soon receive an opt-in notification that states your vehicle is ready to install Ocean OS 2.0 (1 of 3). You can accept this opt-in notification directly from your vehicle's Central Touchscreen.

Please Note:

Due to the size and scope of Ocean OS 2.0, this software release will be sent in three separate installments that will be reflected in the Software tab of your vehicle settings as:

- Ocean OS 2.0 (1 of 3)
- Ocean OS 2.0 (2 of 3)
- Ocean OS 2.0

It may take up to two weeks before all three installments are pushed to your vehicle. Remember, you must accept the opt-in notification on all three installments to complete the installation. Some features/enhancements outlined in the release notes will not be available until all three installments are successfully downloaded.

Click the link below for detailed instructions on downloading the update and to review the complete release notes.
