DISCUSSION:

NOTE: **Install a battery charger to ensure sufficient battery voltage is provided during the flash process.**

NOTE: **If this flash process is interrupted/aborted, the flash should be restarted.**

1. Reprogram the TCM with the latest software. Detailed instructions for flashing control modules using the wiTECH Diagnostic Application are available by selecting the application's "HELP" tab.
2. Clear any DTCs that may have been set in any modules due to reprogramming. The wiTECH application will automatically present all DTCs after the flash and allow them to be cleared.
