Service Information

Offboard Diagnostic Information System Service (ODIS Service)	Number: VOS-24-21
Subject: ID.4 ECM Coding/Software Configuration Error - **Hotfix Instructions**	Date: Mar. 1, 2024

> *Important:*
> *We recommend installation of this hotfix on one diagnostic device ONLY. Hotfix must be removed immediately after performing the procedure.*

1.0 – Introduction

The hotfix applies to the **ID.4:**

Control module coding/software configuration DA 0001 Engine electronics coding/software configuration NOT OK

After the DA 0019 replacement the ECM loses coding, fault code P064F00: Unauthorized Software/Calibration Detected

may remain active/static and will not clear.

> ➢ *Additional instructions for the technician.*

With Hotfix installed, with the vehicle key placed at the reader coil antenna in center console. Under special functions, run Function clearing system (FES) choosing option to recreate / restore function on AW "0019", then run test plan 0025 – VKMS adaptation. Once completed run ctrl module software configuration on AW "0001". Verify the ECM is now coded, and static ECM faults will clear.

!! The Hotfix must be removed after performing the diagnostic procedure. !!

Service Information

2.0 – Prerequisite

ODIS Service **Diagnostic Content version 2.49.6** must be installed.

To confirm the installed diagnostic content version in ODIS Service, go to: **Info > Versions.**

3.0 – Download Hotfix

1. Open a **Web Browser** on the diagnostic device and logon to **vwhub.com**

2. Navigate through **Elsa2Go>Service References>Software/Hardware Updates**

3. Search for **VOS-24-21 ID.4 ECM coding/software Zip File**

4. Click the **ID.4 ECM coding/software Zip File** and **Save** it to your Windows desktop.
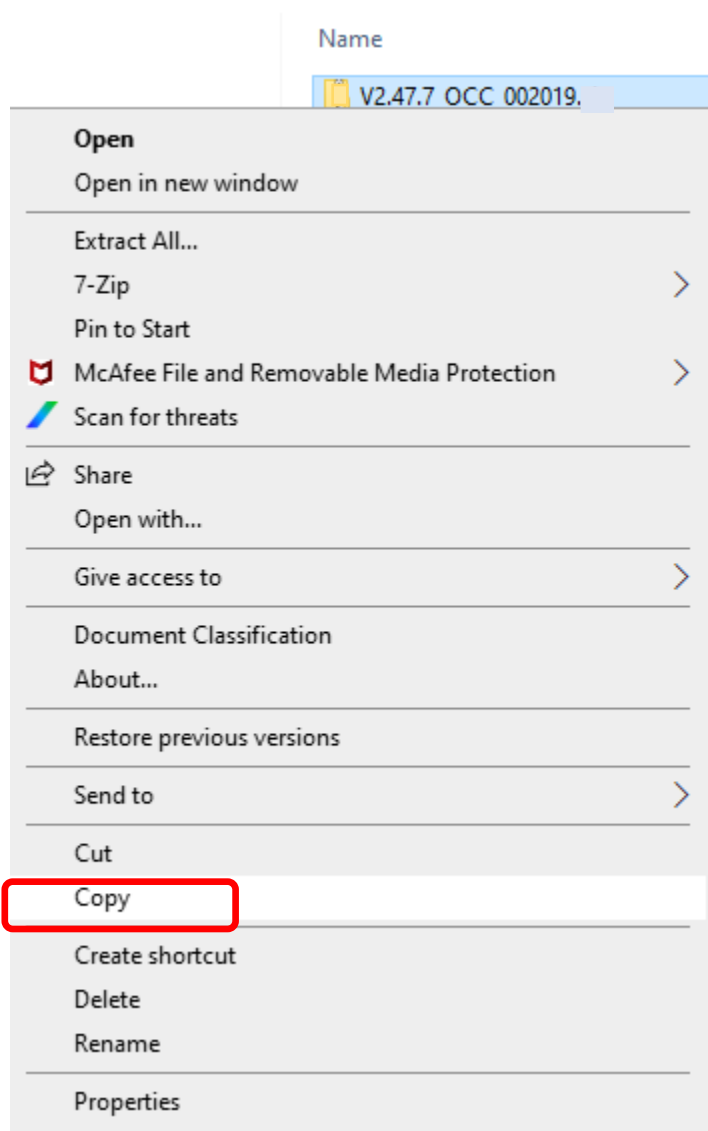

5. Close your browser.

(continued)
