

Service Alert

Mazda North American Operations
Irvine, CA 92618-2922

Subject: PHEV VEHICLE WILL NOT START (NO READY-ON) DUE TO 12V BATTERY AND/OR HIGH VOLTAGE BATTERY DISCHARGED	Service Alert No.: SA-019/24
	Last Issued : 03/15/2024

BULLETIN NOTES

This bulletin supersedes the previously issued Service Alert(s) listed below.

Previous SAs:	Date(s) Issued:
SA-051/23	10/23/23 and 09/01/23

APPLICABLE MODEL(S)/VINS

2024 CX-90 PHEV

2025 CX-70 PHEV

DESCRIPTION

Some customers may experience a vehicle no start (no "Ready-ON") due to the 12V battery discharged or the High Voltage (HV) battery discharged. This may be caused by:

- Ignition left ON when exiting the vehicle (exiting the vehicle during "Ready-On").
- Door/liftgate opened multiple times without ignition "Ready-ON" or driving vehicle.
- Installation of aftermarket electronic devices.

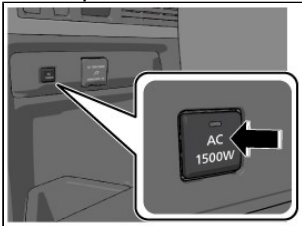

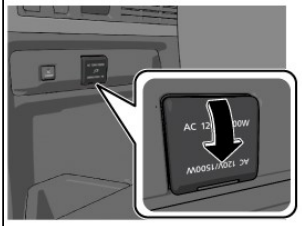

To minimize THE battery drain concern, ensure that the vehicle shift selector is in Park when exiting and verify the ignition is turned OFF when exiting.

NOTE: If multiple door/liftgate opening without "Ready-ON", drive vehicle to charge 12V battery.

Customers having this concern should have their vehicle repaired using the following repair procedure.

CONSUMER NOTICE: The information and instructions in this bulletin are intended for use by skilled technicians. Mazda technicians utilize the proper tools/ equipment and take training to correctly and safely maintain Mazda vehicles. These instructions should not be performed by "do-it-yourselfers." Customers should not assume this bulletin applies to their vehicle or that their vehicle will develop the described concern. To determine if the information applies, customers should contact their nearest authorized Mazda dealership.
