

SSM 52368 2024 Escape/Bronco Sport - 1.5L - Various Engine Performance Concerns At Delivery Due To Fuel Quality Differences

2024 Escape and Bronco Sport vehicles equipped with 1.5L engines should add local fuel once the vehicle arrives at the dealership to reduce the risk of various engine performance concerns such as: rough operation, idle quality, engine misfires, lack or loss of engine power. These conditions may occur due to different fuel specifications between the manufacturing plant and the final market. Make sure that the vehicles in stock have local fuel added.
