TECHNICAL SERVICE BULLETIN				
SUBJECT: SERVICE ACTION: INTEGRATED LED HEADLAMP				
CONTROL UNIT OPERATION	N LOGIC IMPROVEM	ENT (SA567)		

This bulletin provides information to upgrade the software on the Integrated LED Headlamp Control Unit 'ILCU' on certain 2024MY EV9 (MV) vehicles produced from September 25, 2023 through January 25, 2024. The ILCU can switch from 'standby mode' to 'active mode' potentially causing the 12V auxiliary battery to discharge while the vehicle is parked. If this occurs, the vehicle might not be able to be started. Follow the procedure outlined in this publication to upgrade <u>both</u> the left-hand <u>and</u> right-hand software logic of the 'ILCU' system using the KDS ECU Upgrade function as described in this bulletin on the applicable vehicle. For confirmation that the latest reflash has been applied to a vehicle you are working on, verify the ROM ID using the table on page 3 of this bulletin.
