

SSM 52440 2024 Mustang GT - Inoperative Auto Start-Stop - Built On And After 15-Nov-2023 And Through 26-Mar-2024

Some 2024 Mustang GT vehicles built on 15-Nov-2023 and through 26-Mar-2024 may exhibit an inoperative auto start-stop feature. This may be due to the body control module (BCM) configuration. Engineering is currently working on a solution for this condition that is expected June 2024. Replacement or reprogramming of the BCM will not resolve this condition. Monitor OASIS for additional information and schedule service appointments for customers once the repair becomes available. Vehicles built on or before 14-Nov-2023 are not equipped with auto start-stop and the Workshop Manual (WSM) is in the process of being updated with this information.
