

Subject: NOISE FROM ENGINE COMPARTMENT AT IDLE	Bulletin No.: 01-004/24
	Last Issued : 05/30/2024

BULLETIN NOTES

APPLICABLE MODEL(S)/VINS

2024 CX-90 (MHEV inline 6) with VINS lower than JM3KK*****161438 (produced before February 29, 2024)

DESCRIPTION

Some customers may complain about a noise from the engine compartment at idle. This may be caused by the fuel injection learning cycle at idle from the high pressure fuel pump. To eliminate this concern, the control software of the PCM has been modified.

Customers having this concern should have their vehicle repaired using the following repair procedure.

REPAIR PROCEDURE

1. Verify the customer concern.
2. Reprogram the **PCM** and **TCM** with the Mazda Modular Diagnostic System (M-MDS), using Mazda Diagnostic And Repair Software (MDARS). Refer to MDARS ECU Reprogramming Procedure.

NOTE:

- **Be sure to submit ODR data as it is a required item and will be checked during warranty claim submission. Instructions can be found under M-MDS -> MDARS (Uploading ODR Data).**
- Reprogramming is not necessary if current calibration file name in the ECU FILENAME screen is the same as shown in Calibration Files Information or with later suffix.
- After the reprogramming, pending DTC P2610:00 [PCM] may be stored without the CHECK ENGINE light ON. Since this DTC may turn to a current DTC depending on operations after the reprogramming, clear DTC after all repair work is done.

3. Clear any other DTCs.

4. Verify the repair by starting the engine and confirming there is no CHECK ENGINE light ON or abnormal warning lights present.

NOTE :

- Learning cycles after TCM reprogramming is not necessary for this and later version of the calibration file
- If any DTCs should remain after deleting DTC, diagnose the DTCs according to the appropriate Troubleshooting section in MGSS.

CONSUMER NOTICE: The information and instructions in this bulletin are intended for use by skilled technicians. Mazda technicians utilize the proper tools/ equipment and take training to correctly and safely maintain Mazda vehicles. These instructions should not be performed by "do-it-yourselfers." Customers should not assume this bulletin applies to their vehicle or that their vehicle will develop the described concern. To determine if the information applies, customers should contact their nearest authorized Mazda dealership. CALIBRATION

Powertrain	Fuel	ECU Name	File Name (Old)	File Name (New)
H3T (3.3L)	Regular	PCM	H301-188K2-P	H301-188K2-R*
		TCM	H327-21PS1-J	H327-21PS1-K*
	Premium	PCM	H302-188K2-P	H302-188K2-R*
		TCM	H328-21PS1-J	H328-21PS1-K*

*: MDARS will load the correct PCM software automatically, depending on the engine.

WARRANTY INFORMATION**NOTE:**

- This warranty information applies only to verified customer complaints on vehicles eligible for warranty repair.
- This repair will be covered under Mazda's Powertrain Warranty, CA Emissions Warranty (long term) or Federal Emissions Warranty (long term).
- Additional diagnostic time cannot be claimed for this repair.

Warranty Type	A
Symptom Code	82
Damage Code	9W
Part Number Main Cause	5555-18-881
Quantity	0
Operation Number / Labor Hours:	XXWPLXFX / 0.3 Hrs.
