

OTA v2.1.64 Telematics Control Module

The image shows a dark-themed notification window for an Over-the-Air (OTA) update. At the top, there is a white icon of a cloud with a downward-pointing arrow, indicating a download or update. Below the icon is a faint, dark silhouette of a car. The notification text is displayed in a light gray font on a dark background. The title of the update is "OTA v2.1.64 Telematics Control Module". Underneath, there is a section titled "Updates & Fixes" which contains a single bullet point: "• This software update improves connectivity of the telematics control module." The notification window has a thin white border on the right side.

OTA v2.1.64 Telematics Control Module

Updates & Fixes

- This software update improves connectivity of the telematics control module.
