

Cascadia Mekra Mirrors Availability Update

Communication Type: Product News

Date: 5/13/2024

This message is follow up to the communication sent Tuesday April 23, 2024 regarding the Cascadia mirror shortage due the fire at the Mekra factory in Escobedo, Mexico. DTNA has identified a solution to address this situation and is currently working on an implementation process. As previously outlined in the April 23 communication, you should still expect a minimum delay of at least 30 days from the projected delivery as we work through off-line. We will communicate the details of the identified solution, as well as next steps along with any updated delivery timeframe expectations in the next 7-10 days.
