REASON FOR THIS COMMUNICATION

To inform you that Ford Motor Company is notifying vehicle owners of an optional product improvement program on the affected vehicles. This communication will help you answer customer questions. Customers of early-launch 2021 F-150 or 2021 Mustang Mach-E with Ford Co-Pilot360™ Active 2.0 Prep Package (includes BlueCruise Prep Kit 43C/50G) will receive:

- Ford *Software Updates* that have the ability to deliver the BlueCruise hands-free driver assist feature over-the-air (OTA), which began deployment to customer vehicles in the first quarter of 2022. Software updates delivered OTA could take several weeks or more before all software is delivered, and the feature is fully functional. The updates also will include some new features while accelerating the pace of future features and enhancements.
- Or, the option of complimentary dealer installation of the BlueCruise hands-free driver assist feature software (Dealer software installation takes 2 to 8+ hours).
- One (1) year of complimentary BlueCruise service once the hands-free driver assist feature is fully installed on the vehicle.

NOTE: Program 21G01 does not include those vehicles equipped with full BlueCruise functionality produced after the dates in the Affected Vehicle table above (approximately 35,000 Job 2 and 22MY vehicles as of January 2022).

REASON FOR THIS OPTIONAL PRODUCT IMPROVEMENT PROGRAM

The Active Drive Assist (BlueCruise) hands-free software was not yet available on early-launch vehicles that included the Prep Kit. The Ford Co-Pilot360™ Active 2.0 Prep Package was created to ensure early customers have access to the BlueCruise feature when software is available. F-150 (43C) / Mustang Mach-E (50G) vehicles equipped with the Ford Co-Pilot360™ Active 2.0 Prep Package contain hardware through the Active Drive Assist (BlueCruise) Prep Kit that will enable the activation of the full BlueCruise hands-free feature once the software is installed on the vehicle.

New! SERVICE ACTION

Upon customer request, dealers are to install the BlueCruise hands-free driver assist feature software on all necessary modules using *the latest version of the* Ford Diagnosis and Repair System (FDRS). This service must be performed on all affected vehicles at no charge to the vehicle owner.

- *SYNC software version/revision number update*
- *New corrections and clarifications*

New! SERVICE ACTION (continued)

Pick-Up and Delivery *- For Remote Experience Participating Dealers ONLY: To assist vehicle owners to have this repair completed dealers should:*

- *Arrange to pick up the owner's vehicle and drive it to the dealership for repairs (rentals are authorized – see Rental Vehicles)*
- *Re-deliver the owner's vehicle after repairs have been completed.*
- *Refer to the Rental and Claiming sections for further details.*

NOTE: Prior to the customer leaving their vehicle at the dealership, please ensure the customer has enabled FordPass Connected Services on their vehicle using their FordPass application. BlueCruise will not work unless FordPass is enabled.

Activate FordPass Connect

1. Download FordPass from the App Store® or Google Play™
2. Log in with your Ford account or create an account if you don't already have one
3. Press the + sign to add your vehicle to FordPass
4. Scan or type in your VIN and select "Activate Vehicle"
5. Start your vehicle and select "Yes" to enable FordPass Connected Services on the dashboard SYNC® 4A touchscreen to complete activation

NOTE: BlueCruise works with multiple modules. The actual service action is dependent upon vehicle status with the Ford *Software Update*/OTA software updates.

Testing BlueCruise to confirm function: A 0.5 Hour labor allowance is given to test drive BlueCruise Hands-Off functionality in a Blue Zone.

- Determine the nearest hands-free Blue Zone roadway entry ramp locations near your Dealership.
- See **Blue Zone Information** (attachment)- GPS Coordinates can be used with online mapping to provide directions from dealer. Ranked per closest entry point.
- Online detail can be found at: https://www.ford.com/technology/bluecruise/
    - See **Blue Zone Information** for more instruction.
- If test drive can be completed within the allocated Labor Time of 0.5 hours, perform test drive. NOTE: BlueCruise Test drive over 0.5 hours is optional.
- The Hands-On function can still be tested on any open highway with clearly defined lane markings with a vehicle speed above 40 mph (64kmh).
- Some dealers may not have a Blue Zone within a reasonable distance but can still test the Hands-On function as noted above.

OVER-THE-AIR (OTA) UPDATES (FORD *SOFTWARE UPDATE*):

To help customers receive their BlueCruise software updates as quickly as possible with the Ford *Software Update*/OTA, please encourage customers to connect their vehicle to Wi-Fi and have them set a schedule for their software updates in their vehicle. While many Ford *Software Updates* will be delivered in one step, there will be multiple updates that help enable BlueCruise. Most BlueCruise updates will happen in the background while customers are driving, so feature activation timing will vary based on driving patterns. There will be several updates that require the vehicle to be parked and turned off and include an "Update Now" option for quicker updates than pre-scheduled times that customers may have set. For more information on Ford *Software Updates*/OTA Software Updates, please visit: *https://www.ford.com/support/category/sync-and-technology/software-updates/*

- Before scheduling service for an OTA-capable vehicle, please verify through PTS that the Field Service Action (FSA) is still open (OASIS) and that the vehicle has not already received the OTA update.

© Copyright 2024 Ford Motor Company

OVER-THE-AIR (OTA) UPDATES (FORD *SOFTWARE UPDATE*): (continued)

- Verify FSA is still open by viewing the "Outstanding Field Service Actions" on the OASIS results page on PTS. (Note: If the OTA update was recently downloaded onto the vehicle the FSA may still show as open)
- If the FSA is still open in the Outstanding Field Service Actions section, proceed to the tab titled "Connected Vehicle". In the "Over The Air Update 60 Day History", you can determine if an OTA update occurred on the affected module by viewing the "Completion Status", which should show "Campaign Successful". The "Release Notes" will also indicate that the campaign was successfully downloaded onto the vehicle. (Note: the FSA may still show as open in the Outstanding Field Service Actions section of PTS even though the OTA update was successfully downloaded onto the vehicle. This FSA will eventually be removed from the Outstanding Field Service Actions screen of PTS.)

FORD BLUECRUISE FEATURE DESCRIPTION

BlueCruise hands-free highway driving allows drivers to operate their vehicle hands-free while a driver-facing camera monitors that their eyes remain on the road. This technology is available on certain sections of prequalified, divided highways referred to as "Hands-Free Blue Zones." This feature grants an additional level of comfort during long drives and is designed to reduce stress while driving with the driver's eyes on the road.

OWNER NOTIFICATION MAILING SCHEDULE

Owner letters were mailed the week of May 23, 2022. Revised owner letters for non-updated vehicles were mailed the week of June 5, 2023.

Owners will be given the option of installing the software update themselves, or they can have their dealer perform the service for them. Customers will be encouraged to ensure their vehicle is configured to receive updates via OTA.

NEW! Important Information for Module Programming

NOTE: When programming a module, use the following basic checks to confirm programming completes without errors.
- Make sure the 12V battery is fully charged before carrying out the programming steps.
- Connect FDRS/scan tool to a power source.

NOTE: A good internet connection is necessary to identify the vehicle and to load the diagnostic software.
- Inspect VCM/VCMM and cables for any damage. Make sure scan tool connections are not interrupted during programming.
- A hardwired connection is strongly recommended.
- Turn off all unnecessary accessories (radio, heated/cooled seats, headlamps, interior lamps, HVAC system, etc.) and close doors.
- *Turn the accessories back on after programming has completed.*
- Disconnect/depower any aftermarket accessories (remote start, alarm, power inverter, CB radio, etc.).
- Follow all scan tool on-screen instructions carefully.
- Disable FDRS/scan tool sleep mode, screensaver, hibernation modes.
- Create all sessions key-on-engine-off (KOEO). Starting the vehicle before creating a session will cause errors within the programming inhale process.

Recovering a module when programming has resulted in a blank module

a. Disconnect the VCM II/VCM III or the VCMM from the data link connector (DLC) and your PC.
b. After ten seconds, reconnect the VCMII/VCMIII or the VCMM to the DLC and the PC. Launch FDRS. The VCMII/VCMIII or the VCMM icon should turn green in the bottom right corner of the screen. If it does not, troubleshoot the FDRS to VCM connection.
c. If you are using the same FDRS as the initial programming attempt, select the appropriate VIN from the Vehicle Identification menu. If you are using a different FDRS, select “Read VIN from Vehicle” and proceed through the Network Test.
d. In the Toolbox menu, navigate to the failed module and Download/Run Programmable Module Installation (PMI). Follow the on-screen prompts. When asked if the original module is installed, select “No” and continue through the installation application.
e. Once programming has completed, a screen may list additional steps required to complete the programming process. Make sure all applicable steps are followed in order.
