

STAR ONLINE PUBLICATION

Case Number: S2308000065 Rev.A

Release Date: June 2024

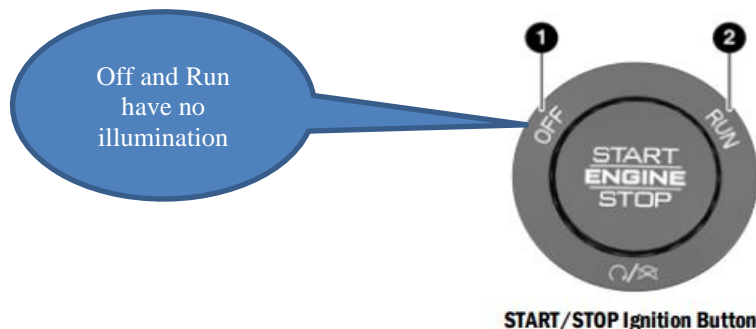

Symptom/Vehicle Issue: Keyless Go Button, Keyless Ignition Node (KIN) Operational Characteristics, Cluster Security Lamp On or Flashing, No Off/Run Illumination

Discussion: The system uses a key fob, keyless push button ignition and a Radio Frequency (RF) receiver to prevent unauthorized vehicle operation.

After placing the ignition in the ON/RUN position, the **Vehicle Security Light** on the cluster will turn on for three seconds for a bulb check and then turn off, however if the light remains on after the bulb check, it indicates that there is a problem with the electronics requiring dealer service.

If the light begins to flash after the bulb check, it indicates that someone attempted to start the engine with an invalid key fob.

If the Vehicle Security Light turns on during normal vehicle operation (vehicle running for longer than 10 seconds), it indicates that there is a fault in the electronics and the vehicle should be serviced as soon as possible.

1 – OFF
2 – ON/RUN

This document does not authorize warranty repairs. This communication documents a record of past experiences. STAR Online does not provide any conclusions about what is wrong with the vehicle. Rather, it captures all previous cases known that appear to be similar or related to the vehicle symptom / condition. You are the expert, and you are responsible for deciding on the appropriate course of action.
