SERVICE SOLUTION: Recuperative restriction warning

## MODEL

Model	Model Description	Model Code
K06	CE-02	0C73

## SITUATION

The recuperation restriction warning is displayed in the instrument cluster.

The following fault is stored in the engine control unit:

- 0x3A40D0 - Restriction of recuperation, available battery charging capacity

The warning indicates that only limited recuperation is possible. It may be necessary to apply the brake to achieve a deceleration that is normally achieved with recuperation.

### When the warning is displayed:

- The warning is displayed when the possible recuperation is less than or equal to 30%.
- The warning is also displayed when the battery temperature is below 50°F (10 °C) or above 113°F (45 °C).

## PROCEDURE

Inform the customer about this behavior of the fault and when it displays.

If the fault memory was saved due to the high charge level or a corresponding outside temperature, no further steps are required.

## QUESTIONS REGARDING THIS BULLETIN

Technical inquiries	Contact the BMW Technical Support Group via TSARA
Warranty inquiries	Submit an IDS ticket to the Warranty Department
Parts inquiries	Submit an IDS ticket to the Motorrad Parts Department
