

## STAR ONLINE PUBLICATION

**Case Number:** S2402000001

**Release Date:** June 2024

**Symptom/Vehicle Issue:** Clunking Noise From Front Stabilizer Bar / Sway Bar Link.

**Customer Complaint/Technician Observation:** Clunking or popping noise from front end over bumps or suspension movement. Noise could also be induced in driving situations such as a driveway entrance with body sway.

**Discussion:** Prior to any part replacement, check the sway bar link fastener torque. For most current and accurate torque specifications refer to Service Library service information 02 - Front Suspension / Front, Independent Front Suspension / Technical Specifications.

This document does not authorize warranty repairs. This communication documents a record of past experiences. STAR Online does not provide any conclusions about what is wrong with the vehicle. Rather, it captures all previous cases known that appear to be similar or related to the vehicle symptom / condition. You are the expert, and you are responsible for deciding on the appropriate course of action.

**Contact STAR Center, or your Technical Assistance Center Via TechConnect, eCONTACT or Service Library entry if no solution is found.**
