Customer Satisfaction Program 23N04

2016 Transit

Your Vehicle Identification Number (VIN): 1FDWS9PV5GKA77435

At Ford Motor Company, we are committed not only to building high-quality, dependable products but also to building a community of happy, satisfied customers. To demonstrate that commitment, we are providing a Customer Satisfaction Program for your vehicle with the VIN shown above.

Why are you receiving this notice? Although your vehicle's Exhaust Gas Temperature (EGT) sensor is likely functioning fine, we are pleased to let you know that Ford Motor Company is offering a one-time repair of the EGT sensor on the exhaust manifold if it requires replacement within certain time and vehicle mileage limitations.

On your vehicle, the EGT sensor on the exhaust manifold may break due to thermal shock/stress from rapid heating/cooling cycles, the Malfunction Indicator Light (MIL) may illuminate, and your vehicle may experience a 30% reduction of power.

What is the effect? If required, this one-time repair of your vehicle's EGT sensor is available for a total of 11 years or 120,000 miles from the warranty start date, whichever occurs first. If your vehicle has already exceeded either time or mileage limits listed above, this one-time repair offer will last through May 31, 2025. Coverage is automatically transferred to subsequent owners.

What will Ford and your dealer do? If your vehicle requires repair to the EGT sensor and your vehicle is within the indicated time/mileage limitations, Ford Motor Company has authorized your dealer to replace the EGT sensor free of charge (parts and labor) with an EGT sensor of improved design. This is a one-time repair program.

How long will it take? If the component mentioned above requires replacement, the time needed for this repair is less than one-half day. However, due to service scheduling requirements, your dealer may need your vehicle for a longer period of time.
