

Volvo Chassis - Debris In 13L Cooling Systems Filled With Extended Life (VCS2)

Published 9 July 2024

Valid For

All Volvo models Built July 2023 to Current

Observing debris within the cooling system is possible, with this debris potentially being dark and resembling sand. Such debris has the potential to cause blockages in both the heater core and oil cooler.

If the truck is unacceptable to be driven with the contamination (dark color, large deposits of debris), please start an e-service case (**Directed to the Reliability Group**) to document the issue, please include pictures and send a coolant sample to the address below. Verify cab heat and report findings in the e-service case.

Volvo Group Trucks Technology
Attn: Patrick Holmes, Drop Area B3
13302 Pennsylvania Ave
Hagerstown, MD 21742
USA

Flush the coolant (per IMPACT 2609-11-03-01) and install a new coolant filter, over flow tank, and fill with new coolant.

Part Number	Description	Qty
-------------	-------------	-----

23915461	Expansion Tank	1
21937327	Coolant filter	1
	Coolant VCS2	

Once the root cause has been determined a better short term and long term solution will be provided.
