CAL FTL 13-002

## Work Instructions

1. Remove the air compressor, resonator, and all suction lines between the air filter box and the air compressor. For instructions, see the appropriate section in the *Workshop Manual*.
2. Install the new air compressor, resonator, and all the suction lines between the air filter box and the air compressor. For instructions, see the appropriate section in the *Workshop Manual*.
3. Ship the removed air compressor, resonator, and suction lines to Detroit Diesel Corporation at the address listed below. Use DDC UPS Account No. E49591. Be sure to label the components and/or package with the VIN and/or engine serial number.
4. Use claim type Detroit QST when filing for warranty.
