

SSM 52703 2021-2024 Bronco - Interior Door Handle Lock Cable Mounting Bracket Available Separately From Cables And Latch Assemblies

Some 2021-2024 Bronco vehicles may require servicing of the interior door handle lock cable mounting bracket on the interior door handle. The interior door handle cable mounting bracket, base part number 78219A64 (right) and 78219A65 (left), are now available to service separately from the cables and latch mechanisms. It is no longer necessary to replace the complete latch assembly for a damaged interior door handle lock indicator mounting bracket.
