2030683/4	9/28/18	Update to model and model year applicability.
2030683/3	7/21/17	Update to current standard.
2030683/1	8/24/17	Original publication.

Technical Background

NA.

Service

When installing a new engine for any reason, it is important to ensure that all components being transferred from old engine to new engine are cleaned and inspected before installation. Examples of parts that should be inspected include, but are not limited to, intake manifold, exhaust manifold, oil cooler and filter flange assembly, catalytic converter (remove and tap test to check for metal debris), and the turbocharger and oil feed lines.
