

Software Update 3.5.3.1

Software updates are designed to help make your vehicle better over time.

1

Bluetooth, Comfort, and Control

- More seamless device integration with improved Bluetooth, including enhanced Low Battery notifications and Dual Phone support.
- Enhanced Projection Services provide a more intuitive connection to CarPlay and Android Auto, with an improved display size and interface.
- Our latest Comfort and Control updates focus on reducing distractions with better pop-up timing and clearer HMI text, alongside an improved Auto Hitch screen for your convenience.
