

QUARANTINE N907 – FAILURE TO COMPLY WITH EMISSIONS LEVELS

QUARANTINE N907 – FAILURE TO COMPLY WITH EMISSIONS LEVELS	
AFFECTED MODELS	24MY Defender 130 vehicles equipped with 5.0L S/C V8
VOLUME AFFECTED	US 56 CAN 10
REPAIR	A concern has been identified for specific vehicles within the above vehicle range. Testing of V8 S/C 5.0L Gasoline Defender vehicles has revealed an inability to meet the noxious gas pollutant levels for every grade of fuel during a certification test drive cycle. As a result, vehicles of this specification do not comply with the certified state and may not be sold or imported into USA and Canada until they are capable of meeting the legal limits and as certified state.
REPAIR TIME	TBD
CAMPAIGN LAUNCH	Retailer Notification on June 10th, 2024. This was rescinded for 90/110 models on June 28 th , 2024.
NOTES	On June 28th, following feedback from US authorities, this quarantine is no longer required for 90 and 110 vehicles and is now rescinded. All affected 130 variants are being held at ports of entry until emissions certification and any required vehicle updates are complete.
