

OTA v2.3.10 Sirius XM, Regenerative Braking, HomeLink, Charging

OVERVIEW

Here is what's new with this update:

SiriusXM Enhancements

Improved app start-up behaviors, including:
Better uninterrupted media activation and playback.
Keeping "favorites" settings separate between user profiles.
Preventing activation of duplicate media sources.

Regenerative Braking shortcut

Regenerative braking levels are now available by tapping on a Drive Mode in the Essentials screen of the Pilot Panel.

HomeLink

Your HomeLink buttons will now remain on screen longer (30 sec) as you approach a programmed HomeLink device.

Charging update

Prevents a rare, limited-duration interruption of climate and charging functions.
